Note : Read the following passage and answer the questions.

A Close look at the facts relating nexus. to political interference in administration shows that it is not a one-way process. There is often a nexus between power-hungry and corrupt politicians and civil servants with convenient principles. Many civil servants are only too anxious to oblige the politicians, and then cash the obligation when they need some special favour. So the attitude of self-righteousness adopted by the civil servants is sometimes only a way of covering their own flaws by blaming others.

Every now and then some retired civil servants come out with their memoirs suggesting political interference. It is not usual for the self-styled hero to blame not only interfering politicians but also fellow civil servants for their failures, if any. This attitude of smug self-satisfaction is, unfortunately developed during the years of service. Self preservation is encouraged by our whole system of rules and procedures.

46. Passage suggests that :
