

(Set-“X”)

(DO NOT OPEN THIS QUESTION BOOKLET BEFORE TIME OR UNTIL YOU ARE ASKED TO DO SO)

(M.Phil/Ph.D/URS-EE-2018)

Code

A

Subject : FORENSIC SCIENCE

Sr. No. 100005

Time : 1¼ Hours

Max. Marks : 100

Total Questions : 100

Roll No. _____ (in figure) _____ (in words)

Name : _____ Father's Name : _____

Mother's Name : _____ Date of Examination : _____

(Signature of the candidate)

(Signature of the Invigilator)

CANDIDATES MUST READ THE FOLLOWING INFORMATION/ INSTRUCTIONS BEFORE STARTING THE QUESTION PAPER.

1. All questions are compulsory.
2. The candidates must return the Question book-let as well as OMR answer-sheet to the Invigilator concerned before leaving the Examination Hall, failing which a case of use of unfair-means / mis-behaviour will be registered against him / her, in addition to lodging of an FIR with the police. Further the answer-sheet of such a candidate will not be evaluated.
3. Keeping in view the transparency of the examination system, carbonless OMR Sheet is provided to the candidate so that a copy of OMR Sheet may be kept by the candidate.
4. Question Booklet along with answer key of all the A, B, C, D code will be got uploaded on the University website after the conduct of Entrance Examination. In case there is any discrepancy in the Question Booklet / Answer Key, the same may be brought to the notice of the Controller of Examination in writing / through E.Mail within 24 hours of uploading the same on the University Website. Thereafter, no complaint in any case, will be considered
5. The candidate **MUST NOT** do any rough work or writing in the OMR Answer-Sheet. Rough work, if any, may be done in the question book-let itself. Answers **MUST NOT** be ticked in the Question book-let.
6. **There will be no Negative marking. Each correct answer will be awarded one full mark. Cutting, erasing, overwriting and more than one answer in OMR Answer-Sheet will be treated as incorrect answer.**
7. Use only Black or Blue **BALL POINT PEN** of good quality in the OMR Answer-Sheet.
8. **BEFORE ANSWERING THE QUESTIONS, THE CANDIDATES SHOULD ENSURE THAT THEY HAVE BEEN SUPPLIED CORRECT AND COMPLETE BOOK-LET. COMPLAINTS, IF ANY, REGARDING MISPRINTING ETC. WILL NOT BE ENTERTAINED 30 MINUTES AFTER STARTING OF THE EXAMINATION.**

Question No.	Questions
1.	<p>Criminalistics can be defined as which of the following :</p> <p>(1) Application of Forensic Science to criminal investigation (2) Application of criminology to criminal investigation (3) Application of social sciences to criminal investigation (4) Application of social sciences to criminal investigation</p>
2.	<p>The word 'Forensic' word has been derived from :</p> <p>(1) Latin word Forensis (2) Greek word Forensis (3) French word (4) Roman word Forensis</p>
3.	<p>The principle global site of South Asia for opium production that constitute Golden Crescent are the following except :</p> <p>(1) Iran (2) Thailand (3) Pakistan (4) Afghanistan</p>
4.	<p>The "Journal of Forensic Sciences" is published by which of the following Academy ?</p> <p>(1) Indian Academy of Forensic Sciences India (2) American Academy of Forensic Science, USA (3) British Academy of Forensic Sciences, UK (4) European Academy of Forensic Sciences</p>

Question No.	Questions
5.	The first Serologist to the Government of India Department was established in : (1) 1910 (2) 1915 (3) 1947 (4) None of the above
6.	The first chemical examiner's laboratory was set up in India at which place among the following : (1) Mumbai (2) Madras (3) Kolkata (4) Agra
7.	The first State Forensic Science Laboratory in India was established in the year : (1) 1948 (2) 1950 (3) 1952 (4) 1948
8.	Dying Deposition is recorded by : (1) Relative of the victim (2) Medical Officer (3) Police Officer (4) Magistrate
9.	In India the second CFSL was established during the year 1965 at which place ? (1) Chandigarh (2) Kolkata (3) Hyderabad (4) Delhi

Question No.	Questions
10.	NAAC is the organisation in the country that : (1) Assesses and accredits Forensic Labs (2) Assesses and accredits Hospitals (3) Assesses and accredits private labs only (4) Assesses and accredits higher education Institutions
11.	NIA Stands for : (1) National Investigation Agency (2) National Intelligence Agency (3) National Investigation authority (4) National Interrogation Agency
12.	Among the following the first American serial Killer, Ted Bundy was convicted on the basis of : (1) DNA Profiling evidence (2) Bite marks evidence (3) Toxicological evidence (4) Latent Fingerprints
13.	The first crime laboratory was established in France by Edmond Locard in the year : (1) 1910 (2) 1912 (3) 1906 (4) 1915

Question No.	Questions
14.	<p>According to the principles/Laws of Forensic Science which emphasizes the necessity of correct sampling and packing for the effective use of experts ?</p> <p>(1) Law of individuality (2) Principle of mutual exchange (3) Principle of comparison (4) Principle of Analysis</p>
15.	<p>Which of the following technique is most commonly used to record measurements for the crime scene sketches :</p> <p>(1) Triangulation (2) Baseline (3) Computer-aided design (4) Polar coordinates</p>
16.	<p>In case of Bank robbery as a Forensic expert which of the following method of crime scene search method will be used :</p> <p>(1) Spiral method (2) Zonal method (3) Strip method (4) Grid method</p>
17.	<p>Sinistrality means :</p> <p>(1) An Ambidextrous individual (2) Right handedness (3) Left handedness (4) Hypodactylic individual</p>

Question No.	Questions
18.	<p>Diacritical marks are :</p> <ol style="list-style-type: none"> (1) Blotting of ink (2) Marks used with letter or groups of letters (3) Punctuations (4) Embellishments
19.	<p>Among the four places in India where the bank currency notes are printed, select which of the following is not amongst them ?</p> <ol style="list-style-type: none"> (1) Guntur, Andhra Pradesh (2) Salboni, West Bengal (3) Nashik, Maharashtra (4) Dewas, Madhya Pradesh
20.	<p>The best Preservative for the charred documents is :</p> <ol style="list-style-type: none"> (1) Poly vinyl chloride solution (2) Poly vinyl acetate (3) Poly vinyl carbonate (4) Formalin
21.	<p>In the field of questioned document examination, the Instrument used and named as ESDA stands for:</p> <ol style="list-style-type: none"> (1) Electrostatic device for detection of alteration (2) Electric system for detection of alteration (3) Electrostatic detection apparatus (4) Electronic state detection appliance

Question No.	Questions
22.	Which of the following method is recommended to develop latent fingerprints on human skin : (1) DFO method (2) Silver-iodine plate transfer method (3) Ninhydrin method (4) Amio black method
23.	The essentials of a fingerprint with loop pattern are : (1) A sufficient recurve, a core and a ridge count across a looping ridge (2) A sufficient recurve, a core, a ridge count (3) A sufficient recurve, a core and a delta (4) A sufficient recurve, a delta and minimum one ridge
24.	The concept of Poroscopy was given by : (1) Hans Gross (2) Galton (3) Henry (4) Edmond Locard
25.	The book entitled "The Forensic Science-the Basics" is Authored by : (1) Jay A Siegel (2) Paul Kirk (3) Osterburg and O'Hara (4) Saferstein
26.	Among the following which one form the finger ridges : (1) Minutiae present of the fingers (2) Rows of sweat pores present (3) Dots or islands present (4) Dermal cells present

Question No.	Questions
27.	<p>In case of amputation of one finger, the following print is considered in classification :</p> <ol style="list-style-type: none"> (1) Index finger of other hand (2) Thumb impression of other hand (3) Corresponding finger of the other hand (4) Next finger of the same hand
28.	<p>Computerised fingerprints search systems match points by comparing :</p> <ol style="list-style-type: none"> (1) Bifurcations present (2) Ridge endings (3) Both bifurcations and ridge endings (4) Dots present only
29.	<p>Among the following which one does not constitute the fundamental principles of fingerprints :</p> <ol style="list-style-type: none"> (1) Fingerprint is an individual (2) No two finger have identical ridge characteristics (3) Fingerprints are permanent in nature (4) Fingerprints/ characteristics follow Mendel's law of inheritance
30.	<p>MCT detector is used in :</p> <ol style="list-style-type: none"> (1) FTIR spectrometry (2) Atomic absorption spectrometry (AAS) (3) Gas-Chromatorgraphy-Mass spectrometry (GC-MS) (4) Liquid Chromatography-Mass spectrometry (LC-MS)

Question No.	Questions				
31.	<p>In case of scanning electron microscope, secondary electrons :</p> <ol style="list-style-type: none">(1) Are emitted by the nucleus of the various elements when the object is struck by a beam of X-rays(2) Are emitted when a beam of primary electrons strikes the object(3) Strike the object and then reflect off the surface(4) Strike the object releasing other electrons				
32.	<p>The "fingerprint" region of IR spectrum can be subdivided into the following except :</p> <table border="0" style="width: 100%;"><tr><td>(1) Below 500 cm-1</td><td>(2) Below 1000 cm cm-1</td></tr><tr><td>(3) 1350-1000 cm-1</td><td>(4) 1500-1350 cm-1</td></tr></table>	(1) Below 500 cm-1	(2) Below 1000 cm cm-1	(3) 1350-1000 cm-1	(4) 1500-1350 cm-1
(1) Below 500 cm-1	(2) Below 1000 cm cm-1				
(3) 1350-1000 cm-1	(4) 1500-1350 cm-1				
33.	<p>The "magic angle" of NMR is at :</p> <table border="0" style="width: 100%;"><tr><td>(1) 60.8 degrees</td><td>(2) 120 degrees</td></tr><tr><td>(3) 54.7 degrees</td><td>(4) 90 degrees</td></tr></table>	(1) 60.8 degrees	(2) 120 degrees	(3) 54.7 degrees	(4) 90 degrees
(1) 60.8 degrees	(2) 120 degrees				
(3) 54.7 degrees	(4) 90 degrees				
34.	<p>Among the following which of the following statements is Not true ?</p> <ol style="list-style-type: none">(1) Handwriting of an individual shows natural variations(2) Alcohol consumption may cause variations in one's handwriting(3) The handwriting of an individual remains unaffected by advancing age(4) The handwriting is affected by space available for writing and may show variations				

Question No.	Questions
35.	<p>In Gas chromatography the basis for separations of the components is the difference in :</p> <p>(1) Partition coefficient (2) Conductivity (3) Molecular weight (4) Molarity</p>
36.	<p>Among the following which one is the major difference between gas chromatography (GC) and High pressure liquid Chromatography (HPLC):</p> <p>(1) HPLC always uses at least two liquids in its stationery phase (2) GC has a liquid mobile (3) GC uses columns to hold the mobile phase, whereas HPLC does not (4) GC columns are heated whereas HPLC columns are kept at room temperature</p>
37.	<p>In polarized light microscope, a polarizer is placed :</p> <p>(1) Above the sample (2) Below the sample (3) Below the objective (4) Above the objective</p>
38.	<p>A dichroic mirror is an incorporation of optical accessory in :</p> <p>(1) Electron microscope (2) Fluorescence microscope (3) Simple microscope (4) Stereomicroscope</p>

Question No.	Questions
39.	<p>Among the following techniques which gives more conclusive results for gun short residue detection in shooting cases :</p> <ol style="list-style-type: none">(1) Scanning electron microscope with energy dispersive analysis(2) Inductively coupled plasma (ICP)(3) Atomic absorption spectrometry (AAS)(4) Neutron activation analysis (NAA)
40.	<p>Among the following in which methods, Hollow cathode lamps is used as radiation source :</p> <ol style="list-style-type: none">(1) Raman spectrophotometer(2) IR spectrophotometer(3) UV-Vis spectrophotometer(4) Atomic absorption spectrophotometer
41.	<p>Chronograph is an instrument which measures the following in Forensic Ballistics ?</p> <ol style="list-style-type: none">(1) Angle of fire of a gun(2) Trajectory of the projectile(3) Velocity of the projectile(4) Temperature inside the barrel of gun

Question No.	Questions
42.	<p>In the analysis of striated tool marks, the spacings in between the striations change because of :</p> <ul style="list-style-type: none">(1) Nature of surface on which the tool acts(2) Angle of progression(3) Both angles of tilt and progression(4) Angle of tile
43.	<p>Among the following which one is the most versatile detector :</p> <ul style="list-style-type: none">(1) FID(2) NIPD(3) MS detector(4) UV- detector
44.	<p>What is the alternative test after failure of spermatozoa test for the identification of semen stains ?</p> <ul style="list-style-type: none">(1) Acid phosphatase test(2) Choline test(3) Thin layer chromatography(4) Prostate-specific antigen test
45.	<p>Among the following which is the type of biological evidence that contains haploid cells ?</p> <ul style="list-style-type: none">(1) Saliva(2) Hair(3) Sperm(4) Blood

Question No.	Questions
46.	<p>Males having a low sperm count suffer from a condition known as :</p> <p>(1) Oligospermia (2) Necrospermia</p> <p>(3) Tertospermia (4) Aszopermia</p>
47.	<p>An examination of the development stages of the insects present on the decomposed corpse may yield valuable information about :</p> <p>(1) The age of the deceased</p> <p>(2) The circumstance surrounding the death</p> <p>(3) The identification of the deceased</p> <p>(4) The poison ingested by the deceased</p>
48.	<p>The scientific name of Chiru is:</p> <p>(1) Antilope cervicapra (2) Pantholops hodgsonii</p> <p>(3) Capra aegagrus (4) Vulpes bengalensis</p>
49.	<p>Christmas Tree stain is used in the identification of :</p> <p>(1) Semen stains (2) Colostrum stains</p> <p>(3) Plant stains (4) Blood stains</p>
50.	<p>The offspring of two parents that are heterozygous for a given trait have a following percent chance of being homozygous for that trait :</p> <p>(1) 10% (2) 25%</p> <p>(3) 50% (4) 100%</p>

Question No.	Questions
51.	<p>The Azlon fibres are of the type of :</p> <p>(1) Regenerated fibres (2) Synthetic fibres (3) Animal fibres (4) Natural fibres</p>
52.	<p>The instrumental analyses most useful for identification of synthetic fibres are :</p> <p>(1) Infrared spectrophotometer and Pyrolysis-gas-chromatography (2) Pyrolysis and atomic absorption spectrophotometry (3) Mass spectrometry and emission spectrophotometry (4) X-rays diffraction and gas chromatography</p>
53.	<p>Dried blood stains are typed primarily by means of :</p> <p>(1) Absorption elution (2) Absorption-inhibition (3) Mixed agglutination (4) Adding anti-A and anti-B antisera to the stain</p>
54.	<p>If a father's genotype is 'OO' and a mother's genotype is BB, their children:</p> <p>(1) Have a 25 percent chance of having type B blood (2) Have a 50 percent chance of having type "O" blood (3) Will all have type 'O' (4) Will all have type B blood</p>
55.	<p>One nanogram (ng) of DNA can be obtained from approximately :</p> <p>(1) 900-1000 diploid cells (2) 600-700 diploid cells (3) 300-400 diploid cells (4) 100-200 diploid cells</p>

Question No.	Questions				
56.	<p>Among the following which is the order of steps in PCR cycling :</p> <ol style="list-style-type: none"> (1) Denaturation, annealing and extension (2) Annealing, denaturation and extension (3) Extension, denaturation and anealing (4) Annealing, denaturation and extension 				
57.	<p>Comparing SNP markers to STR based analysis, which of the following are true ?</p> <ol style="list-style-type: none"> (1) There are many more STR Loci in the genome (2) There are many more SNP markers in the human genome than STR (3) SNP loci generally have more alleles than STR loci (4) The number of SNP loci is about the same as the number of STR loci in the genome 				
58.	<p>Single-stranded DNA molecules that can bind to and be used to detect other DNA molecules are called :</p> <table style="width: 100%; border: none;"> <tr> <td style="width: 50%;">(1) Primers</td> <td style="width: 50%;">(2) Lines</td> </tr> <tr> <td>(3) STR</td> <td>(4) Probes</td> </tr> </table>	(1) Primers	(2) Lines	(3) STR	(4) Probes
(1) Primers	(2) Lines				
(3) STR	(4) Probes				
59.	<p>Single nucleotide polymorphism :</p> <ol style="list-style-type: none"> (1) Can be useful for degraded DNA samples (2) Can be useful for mixed samples from more than one donor (3) Can be useful for forensic identification because of high discriminating power (4) Most DNA databases of SNP profiles exists 				

Question No.	Questions
60.	<p>What is the scientific/ chemical name of Meow meow's drug ?</p> <p>(1) Amphetamines (2) Mephedrone</p> <p>(3) MDMA (4) Cathinone</p>
61.	<p>'X' comes home unexpected and sees his wife in bed with 'Z'. He becomes furious and kills 'Z' with a knife which he finds on the shelf nearby. Which of the following crimes 'X' has committed ?</p> <p>(1) Death by rash and negligent act</p> <p>(2) Culpable homicide amounting to murder</p> <p>(3) Voluntary causing of grievous hurt</p> <p>(4) Culpable homicide not amounting to murder</p>
62.	<p>Which of the following can be used to extract acidic drugs from an aqueous solution ?</p> <p>(1) Methanol and Hydrochloric acid</p> <p>(2) Chloroform and acetic acid</p> <p>(3) Chloroform and ammonium hydroxide</p> <p>(4) Ethanol and Sodium hydroxide</p>
63.	<p>What colour Dilli-Koppanyi reagent gives with barbiturate ?</p> <p>(1) Reddish (2) Purple</p> <p>(3) Green (4) Yellow</p>

Question No.	Questions
64.	<p>LSD is derived from which of the following plant ?</p> <p>(1) Cannabis sativa (2) Papaver somniferum (3) Erthroxyllum sp. (4) Claviceps purpurea</p>
65.	<p>Parathion is metabolized to which of the following product :</p> <p>(1) o-nitrophenol and ethyl phosphate (2) o-nitrophenol and methyl phosphate (3) p-nitrophenol and diethyl phosphate (4) m-nitrophenol and dimethyl phosphate</p>
66.	<p>The morphine content of opium is standardized in the Government opium factory located at :</p> <p>(1) Ghazipur (2) Ghaziabad (3) Gurgaon (4) Gwalior</p>
67.	<p>Select the poisonous mushroom species among the following :</p> <p>(1) Cantharellus cibarius (2) Amanita phalloides (3) Morchella esculenta (4) Boletus edulis</p>
68.	<p>Pheny-2-propanone and formamide are used for the synthesis of :</p> <p>(1) Lysergide (2) Methamphetamine (3) Amphetamine (4) Methylene dioxymethamphetamine</p>

Question No.	Questions
69.	<p>In the manufacture of glass, sodium carbonate is added to sand in order to :</p> <p>(1) Reduce its melting point (2) Prevent glass from dissolving in water (3) Reduce viscosity (4) Provide it greater durability</p>
70.	<p>Select among the following in which the slurry explosive are based on :</p> <p>(1) Potassium chlorate (2) Nitrocellulose (3) Nitroglycerine (4) Ammonium Nitrate</p>
71.	<p>A plastic explosive 'Kirkee' is essentially the following explosive :</p> <p>(1) 2, 4, 6 Trinitrophenyl methyl nitramine (2) 2, 4, 6 Trinitrophenol (3) 2, 4, 6 Trinitrotoluene (4) Cyclo Trimethylene Trinitramine</p>
72.	<p>Which of the following statements is correct ?</p> <p>(1) Two or more persons may have similar DNA (2) Monozygotic twins have identical DNA (3) Two fingers cannot have identical fingerprints (4) Monozygotic twins have identical fingerprints</p>

Question No.	Questions
73.	<p>.Numerous and short radial fractures in glass indicate that the hole has been caused by a :</p> <p>(1) Stone hurled at glass (2) A high velocity rifle bullet (3) A jacketed bullet fired from revolver (4) A lead bullet fired from revolver</p>
74.	<p>The diameter of 8 bore shot gun is :</p> <p>(1) 0.615 inch (2) 0.835 inch (3) 0.729 inch (4) 0.913 inch</p>
75.	<p>A technique used to separate sperm cells and non-sperm cells for DNA analysis in rape cases is called :</p> <p>(1) Chelex Extraction method (2) Organic Extraction method (3) QiaAmp Extraction method (4) Differential Extraction method</p>
76.	<p>Select the most appropriate answer that 7.62 mm AK-47 assault rifle has the magazine capacity of :</p> <p>(1) 20 (2) 25 (3) 30 (4) 40</p>
77.	<p>Walker test of GSR is done for the identification of the presence of :</p> <p>(1) Metallic residue (2) Nitrate (3) Sulphur (4) Nitrite</p>

Question No.	Questions
78.	<p>Amatol contains which of the following ?</p> <p>(1) TNT and RDX (2) TNT and Tetryl (3) TNT and PETN (4) TNT and Ammonium nitrate</p>
79.	<p>Calculation of person's stature from fragmented bones is done :</p> <p>(1) Steele and Mc Kern's formula (2) Pearson's formula (3) Trotter and Glesser formula (4) Depertuis and Hadden's formula</p>
80.	<p>In sex determination from female pelvis all the characteristics are present except :</p> <p>(1) Sub pubic angle is 'V' shaped (2) Greater sciatic notch is wide and shallow (3) Pre-auricular sulcus is prominent (4) Ischial tuberosity if everted</p>
81.	<p>Among the following which is not a feature of a female skull ?</p> <p>(1) Roundish shaped orbits (2) Prominent glabella (3) Prominent parietal eminence (4) Prominent frontal eminence</p>

Question No.	Questions
82.	<p>Ashley's rule states that :</p> <p>(1) Total length of sternum in male is greater than 149 mm (2) Total length of sternum in female is greater than 149 mm (3) Sternal body is more than twice the manubrium in males (4) Sternal body is less than twice the manubrium in females</p>
83.	<p>Skull photo superimposition technique was used for the first time in which of the following cases ?</p> <p>(1) Ruxton murder case (2) Ted Bundy case (3) Frye case (4) Daubert case</p>
84.	<p>How many bones are there in appendicular skeleton of human body ? Select among the following :</p> <p>(1) 106 (2) 206 (3) 126 (4) 76</p>
85.	<p>Cusps of Carabelli are observed on :</p> <p>(1) Central Incisors (2) Canines (3) Bicuspid (4) Tricuspid</p>
86.	<p>Casper's dictum is used in relation to :</p> <p>(1) Mummification (2) Post mortem staining (3) Rigor mortis (4) Putrefaction</p>

Question No.	Questions
87.	<p>The following is not a component of Gustafson's method :</p> <p>(1) Attrition (2) Dentition (3) Root resorption (4) Cementum Apposition</p>
88.	<p>Select the appropriate period of mixed dentition that extends between:</p> <p>(1) 4-10 years (2) 4-12 years (3) 6-12 years (4) 8-12 years</p>
89.	<p>The greatest dimension of an incised wound is :</p> <p>(1) Length (2) Breadth (3) Depth (4) Breadth and depth are equal</p>
90.	<p>Post mortem staining in a dead body appears on :</p> <p>(1) Sides of the body (2) Upper parts of the body (3) Middle part of the body (4) Dependent parts of the body</p>
91.	<p>Identify the correct sequence of the closure of skull structure among the following :</p> <p>(1) Sagittal, Temporal, Metopic, Basal (2) Temporal, Basal, Metopic, Sagittal (3) Metopic, basal, Sagittal, Temporal (4) Basal, Temporal, Metopic, Sagittal</p>

Question No.	Questions
92.	Dilaudid is : (1) Synthetic Cocaine (2) Synthetic Morphine (3) Synthetic Codeine (4) Synthetic THC
93.	The objective of ISO-9000 family of quality management is : (1) Customer satisfaction (2) Employee satisfaction (3) Skill enhancement (4) Environmental issues
94.	Which of the following is the first step in starting the research process : (1) Searching sources of information to locate problem (2) Survey of related literature (3) Identification of problem (4) Searching for solutions to the problem
95.	According to the analysis of digital evidence, what should be the best practice ? (1) Forensic examination of performance directly (2) Design an examination process (3) Create one or more duplicates of the original evidences (4) The documentation and data reduction steps
96.	The most popular software forensic tools include all of the following except : (1) Forensic Toolkit (2) Forensic Autopsy (3) Smart (4) Quicken

Question No.	Questions				
97.	<p>Hash value is used by the forensic experts to :</p> <ol style="list-style-type: none"> (1) To authenticate text data (2) To authenticate images in the given file (3) To authenticate audio/video files (4) To authenticate digital data 				
98.	<p>Among the following which is the most sensitive technique to isolate petroleum products from different substrates :</p> <ol style="list-style-type: none"> (1) Solvent extraction technique (2) Solid-phase micro extraction technique (3) Solid phase extraction technique (4) Acidic or alkali steam distillation 				
99.	<p>Leading questions are not allowed in the examination-in-chief except when the witness is :</p> <table style="width: 100%; border: none;"> <tr> <td style="width: 50%;">(1) Hostile witness</td> <td style="width: 50%;">(2) Paid witness</td> </tr> <tr> <td>(3) Expert witness</td> <td>(4) Ordinary witness</td> </tr> </table>	(1) Hostile witness	(2) Paid witness	(3) Expert witness	(4) Ordinary witness
(1) Hostile witness	(2) Paid witness				
(3) Expert witness	(4) Ordinary witness				
100.	<p>In the FTA method for collection of biological evidence during DNA analysis:</p> <ol style="list-style-type: none"> (1) The DNA is eluted off the paper (2) The DNA stays on the paper (3) Cellular materials are washed away (4) FTA paper allows to dry the stain quickly 				

(Set-“X”)

(DO NOT OPEN THIS QUESTION BOOKLET BEFORE TIME OR UNTIL YOU ARE ASKED TO DO SO)

(M.Phil/Ph.D/URS-EE-2018)

Code **B**

Subject : FORENSIC SCIENCE

Sr. No. 100014

Time : 1¼ Hours

Max. Marks : 100

Total Questions : 100

Roll No. _____ (in figure) _____ (in words)

Name : _____ Father's Name : _____

Mother's Name : _____ Date of Examination : _____

(Signature of the candidate)

(Signature of the Invigilator)

CANDIDATES MUST READ THE FOLLOWING INFORMATION/ INSTRUCTIONS BEFORE STARTING THE QUESTION PAPER.

1. All questions are compulsory.
2. The candidates must return the Question book-let as well as OMR answer-sheet to the Invigilator concerned before leaving the Examination Hall, failing which a case of use of unfair-means / mis-behaviour will be registered against him / her, in addition to lodging of an FIR with the police. Further the answer-sheet of such a candidate will not be evaluated.
3. Keeping in view the transparency of the examination system, carbonless OMR Sheet is provided to the candidate so that a copy of OMR Sheet may be kept by the candidate.
4. Question Booklet along with answer key of all the A, B, C, D code will be got uploaded on the University website after the conduct of Entrance Examination. In case there is any discrepancy in the Question Booklet / Answer Key, the same may be brought to the notice of the Controller of Examination in writing / through E.Mail within 24 hours of uploading the same on the University Website. Thereafter, no complaint in any case, will be considered
5. The candidate **MUST NOT** do any rough work or writing in the OMR Answer-Sheet. Rough work, if any, may be done in the question book-let itself. Answers **MUST NOT** be ticked in the Question book-let.
6. **There will be no Negative marking. Each correct answer will be awarded one full mark. Cutting, erasing, overwriting and more than one answer in OMR Answer-Sheet will be treated as incorrect answer.**
7. Use only Black or Blue **BALL POINT PEN** of good quality in the OMR Answer-Sheet.
8. **BEFORE ANSWERING THE QUESTIONS, THE CANDIDATES SHOULD ENSURE THAT THEY HAVE BEEN SUPPLIED CORRECT AND COMPLETE BOOK-LET. COMPLAINTS, IF ANY, REGARDING MISPRINTING ETC. WILL NOT BE ENTERTAINED 30 MINUTES AFTER STARTING OF THE EXAMINATION.**

Question No.	Questions				
1.	<p>A plastic explosive 'Kirkee' is essentially the following explosive :</p> <p>(1) 2, 4, 6 Trinitrophenyl methyl nitramine (2) 2, 4, 6 Trinitrophenol (3) 2, 4, 6 Trinitrotoluene (4) Cyclo Trimethylene Trinitramine</p>				
2.	<p>Which of the following statements is correct ?</p> <p>(1) Two or more persons may have similar DNA (2) Monozygotic twins have identical DNA (3) Two fingers cannot have identical fingerprints (4) Monozygotic twins have identical fingerprints</p>				
3.	<p>Numerous and short radial fractures in glass indicate that the hole has been caused by a :</p> <p>(1) Stone hurled at glass (2) A high velocity rifle bullet (3) A jacketed bullet fired from revolver (4) A lead bullet fired from revolver.</p>				
4.	<p>The diameter of 8 bore shot gun is :</p> <table data-bbox="252 1736 1447 1942"> <tr> <td>(1) 0.615 inch</td> <td>(2) 0.835 inch</td> </tr> <tr> <td>(3) 0.729 inch</td> <td>(4) 0.913 inch</td> </tr> </table>	(1) 0.615 inch	(2) 0.835 inch	(3) 0.729 inch	(4) 0.913 inch
(1) 0.615 inch	(2) 0.835 inch				
(3) 0.729 inch	(4) 0.913 inch				

Question No.	Questions
5.	A technique used to separate sperm cells and non-sperm cells for DNA analysis in rape cases is called : (1) Chelex Extraction method (2) Organic Extraction method (3) QiaAmp Extraction method (4) Differential Extraction method
6.	Select the most appropriate answer that 7.62 mm AK-47 assault rifle has the magazine capacity of : (1) 20 (2) 25 (3) 30 (4) 40
7.	Walker test of GSR is done for the identification of the presence of : (1) Metallic residue (2) Nitrate (3) Sulphur (4) Nitrite
8.	Amatol contains which of the following ? (1) TNT and RDX (2) TNT and Tetryl (3) TNT and PETN (4) TNT and Ammonium nitrate
9.	Calculation of person's stature from fragmented bones is done : (1) Steele and Mc Kern's formula (2) Pearson's formula (3) Trotter and Glesser formula (4) Depertuis and Hadden's formula

Question No.	Questions
10.	<p>In sex determination from female pelvis all the characteristics are present except :</p> <p>(1) Sub pubic angle is 'V' shaped (2) Greater sciatic notch is wide and shallow (3) Pre-auricular sulcus is prominent (4) Ischial tuberosity is everted</p>
11.	<p>The Azlon fibres are of the type of :</p> <p>(1) Regenerated fibres (2) Synthetic fibres (3) Animal fibres (4) Natural fibres</p>
12.	<p>The instrumental analyses most useful for identification of synthetic fibres are :</p> <p>(1) Infrared spectrophotometer and Pyrolysis-gas-chromatography (2) Pyrolysis and atomic absorption spectrophotometry (3) Mass spectrometry and emission spectrophotometry (4) X-rays diffraction and gas chromatography</p>
13.	<p>Dried blood stains are typed primarily by means of :</p> <p>(1) Absorption elution (2) Absorption-inhibition (3) Mixed agglutination (4) Adding anti-A and anti-B antisera to the stain</p>

Question No.	Questions
14.	<p>If a father's genotype is 'OO' and a mother's genotype is BB, their children:</p> <p>(1) Have a 25 percent chance of having type B blood (2) Have a 50 percent chance of having type "O" blood (3) Will all have type 'O' (4) Will all have type B blood</p>
15.	<p>One nanogram (ng) of DNA can be obtained from approximately :</p> <p>(1) 900-1000 diploid cells (2) 600-700 diploid cells (3) 300-400 diploid cells (4) 100-200 diploid cells</p>
16.	<p>Among the following which is the order of steps in PCR cycling :</p> <p>(1) Denaturation, annealing and extension (2) Annealing, denaturation and extension (3) Extension, denaturation and anealing (4) Annealing, denaturation and extension</p>
17.	<p>Comparing SNP markers to STR based analysis, which of the following are true ?</p> <p>(1) There are many more STR Loci in the genome (2) There are many more SNP markers in the human genome than STR (3) SNP loci generally have more alleles than STR loci (4) The number of SNP loci is about the same as the number of STR loci in the genome</p>

Question No.	Questions
18.	<p>Single-stranded DNA molecules that can bind to and be used to detect other DNA molecules are called :</p> <p>(1) Primers (2) Lines (3) STR (4) Probes</p>
19.	<p>Single nucleotide polymorphism :</p> <p>(1) Can be useful for degraded DNA samples (2) Can be useful for mixed samples from more than one donor (3) Can be useful for forensic identification because of high discriminating power (4) Most DNA databases of SNP profiles exists</p>
20.	<p>What is the scientific/ chemical name of Meow meow's drug ?</p> <p>(1) Amphetamines (2) Mephedrone (3) MDMA (4) Cathinone</p>
21.	<p>In case of scanning electron microscope, secondary electrons :</p> <p>(1) Are emitted by the nucleus of the various elements when the object is struck by a beam of X-rays (2) Are emitted when a beam of primary electrons strikes the object (3) Strike the object and then reflect off the surface (4) Strike the object releasing other electrons</p>

Question No.	Questions
22.	<p>The "fingerprint" region of IR spectrum can be subdivided into the following except :</p> <p>(1) Below 500 cm^{-1} (2) Below 1000 cm^{-1} (3) 1350-1000 cm^{-1} (4) 1500-1350 cm^{-1}</p>
23.	<p>The "magic angle" of NMR is at :</p> <p>(1) 60.8 degrees (2) 120 degrees (3) 54.7 degrees (4) 90 degrees</p>
24.	<p>Among the following which of the following statements is Not true ?</p> <p>(1) Handwriting of an individual shows natural variations (2) Alcohol consumption may cause variations in one's handwriting (3) The handwriting of an individual remains unaffected by advancing age (4) The handwriting is affected by space available for writing and may show variations</p>
25.	<p>In Gas chromatography the basis for separations of the components is the difference in :</p> <p>(1) Partition coefficient (2) Conductivity (3) Molecular weight (4) Molarity</p>

Question No.	Questions
26.	<p>Among the following which one is the major difference between gas chromatography (GC) and High pressure liquid Chromatography (HPLC):</p> <ul style="list-style-type: none">(1) HPLC always uses at least two liquids in its stationery phase(2) GC has a liquid mobile(3) GC uses columns to hold the mobile phase, whereas HPLC does not(4) GC columns are heated whereas HPLC columns are kept at room temperature
27.	<p>In polarized light microscope, a polarizer is placed :</p> <ul style="list-style-type: none">(1) Above the sample(2) Below the sample(3) Below the objective(4) Above the objective
28.	<p>A dichroic mirror is an incorporation of optical accessory in :</p> <ul style="list-style-type: none">(1) Electron microscope(2) Fluorescence microscope(3) Simple microscope(4) Stereomicroscope
29.	<p>Among the following techniques which gives more conclusive results for gun short residue detection in shooting cases :</p> <ul style="list-style-type: none">(1) Scanning electron microscope with energy dispersive analysis(2) Inductively coupled plasma (ICP)(3) Atomic absorption spectrometry (AAS)(4) Neutron activation analysis (NAA)

Question No.	Questions
30.	<p>Among the following in which methods, Hollow cathode lamps is used as radiation source :</p> <ul style="list-style-type: none">(1) Raman spectrophotometer(2) IR spectrophotometer(3) UV-Vis spectrophotometer(4) Atomic absorption spectrophotometer
31.	<p>NIA Stands for :</p> <ul style="list-style-type: none">(1) National Investigation Agency(2) National Intelligence Agency(3) National Investigation authority(4) National Interrogation Agency
32.	<p>Among the following the first American serial Killer, Ted Bundy was convicted on the basis of :</p> <ul style="list-style-type: none">(1) DNA Profiling evidence(2) Bite marks evidence(3) Toxicological evidence(4) Latent Fingerprints
33.	<p>The first crime laboratory was established in France by Edmond Locard in the year :</p> <ul style="list-style-type: none">(1) 1910(2) 1912(3) 1906(4) 1915

Question No.	Questions
34.	<p>According to the principles/Laws of Forensic Science which emphasizes the necessity of correct sampling and packing for the effective use of experts ?</p> <p>(1) Law of individuality (2) Principle of mutual exchange (3) Principle of comparison (4) Principle of Analysis</p>
35.	<p>Which of the following technique is most commonly used to record measurements for the crime scene sketches :</p> <p>(1) Triangulation (2) Baseline (3) Computer-aided design (4) Polar coordinates</p>
36.	<p>In case of Bank robbery as a Forensic expert which of the following method of crime scene search method will be used :</p> <p>(1) Spiral method (2) Zonal method (3) Strip method (4) Grid method</p>
37.	<p>Sinistrality means :</p> <p>(1) An Ambidextrous individual (2) Right handedness (3) Left handedness (4) Hypodactylic individual</p>

Question No.	Questions
38.	<p>Diacritical marks are :</p> <ol style="list-style-type: none"> (1) Blotting of ink (2) Marks used with letter or groups of letters (3) Punctuations (4) Embellishments
39.	<p>Among the four places in India where the bank currency notes are printed, select which of the following is not amongst them ?</p> <ol style="list-style-type: none"> (1) Guntur, Andhra Pradesh (2) Salboni, West Bengal (3) Nashik, Maharashtra (4) Dewas, Madhya Pradesh
40.	<p>The best Preservative for the charred documents is :</p> <ol style="list-style-type: none"> (1) Poly vinyl chloride solution (2) Poly vinyl acetate (3) Poly vinyl carbonate (4) Formalin
	<p>41. Identify the correct sequence of the closure of skull structure among the following :</p> <ol style="list-style-type: none"> (1) Sagittal, Temporal, Metopic, Basal (2) Temporal, Basal, Metopic, Sagittal (3) Metopic, basal, Sagittal, Temporal (4) Basal, Temporal, Metopic, Sagittal

Question No.	Questions
42.	Dilaudid is : (1) Synthetic Cocaine (2) Synthetic Morphine (3) Synthetic Codeine (4) Synthetic THC
43.	The objective of ISO-9000 family of quality management is : (1) Customer satisfaction (2) Employee satisfaction (3) Skill enhancement (4) Environmental issues
44.	Which of the following is the first step in starting the research process : (1) Searching sources of information to locate problem (2) Survey of related literature (3) Identification of problem (4) Searching for solutions to the problem
45.	According to the analysis of digital evidence, what should be the best practice ? (1) Forensic examination of performance directly (2) Design an examination process (3) Create one or more duplicates of the original evidences (4) The documentation and data reduction steps
46.	The most popular software forensic tools include all of the following except : (1) Forensic Toolkit (2) Forensic Autopsy (3) Smart (4) Quicken

Question No.	Questions				
47.	<p>Hash value is used by the forensic experts to :</p> <ol style="list-style-type: none">(1) To authenticate text data(2) To authenticate images in the given file(3) To authenticate audio/video files(4) To authenticate digital data				
48.	<p>Among the following which is the most sensitive technique to isolate petroleum products from different substrates :</p> <ol style="list-style-type: none">(1) Solvent extraction technique(2) Solid-phase micro extraction technique(3) Solid phase extraction technique(4) Acidic or alkali steam distillation				
49.	<p>Leading questions are not allowed in the examination-in-chief except when the witness is :</p> <table border="0" data-bbox="272 1361 1158 1473"><tr><td>(1) Hostile witness</td><td>(2) Paid witness</td></tr><tr><td>(3) Expert witness</td><td>(4) Ordinary witness</td></tr></table>	(1) Hostile witness	(2) Paid witness	(3) Expert witness	(4) Ordinary witness
(1) Hostile witness	(2) Paid witness				
(3) Expert witness	(4) Ordinary witness				
50.	<p>In the FTA method for collection of biological evidence during DNA analysis:</p> <ol style="list-style-type: none">(1) The DNA is eluted off the paper(2) The DNA stays on the paper(3) Cellular materials are washed away(4) FTA paper allows to dry the stain quickly				

Question No.	Questions
51.	<p>'X' comes home unexpected and sees his wife in bed with 'Z'. He becomes furious and kills 'Z' with a knife which he finds on the shelf nearby. Which of the following crimes 'X' has committed ?</p> <ul style="list-style-type: none"> (1) Death by rash and negligent act (2) Culpable homicide amounting to murder (3) Voluntary causing of grievous hurt (4) Culpable homicide not amounting to murder
52.	<p>Which of the following can be used to extract acidic drugs from an aqueous solution ?</p> <ul style="list-style-type: none"> (1) Methanol and Hydrochloric acid (2) Chloroform and acetic acid (3) Chloroform and ammonium hydroxide (4) Ethanol and Sodium hydroxide
53.	<p>What colour Dilli-Koppanyi reagent gives with barbiturate ?</p> <ul style="list-style-type: none"> (1) Reddish (2) Purple (3) Green (4) Yellow
54.	<p>LSD is derived from which of the following plant ?</p> <ul style="list-style-type: none"> (1) Cannabis sativa (2) Papaver somniferum (3) Erthroxyllum sp. (4) Claviceps purpurea

Question No.	Questions
55.	Parathion is metabolized to which of the following product : (1) o-nitrophenol and ethyl phosphate (2) o-nitrophenol and methyl phosphate (3) p-nitrophenol and diethyl phosphate (4) m-nitrophenol and dimethyl phosphate
56.	The morphine content of opium is standardized in the Government opium factory located at : (1) Ghazipur (2) Ghaziabad (3) Gurgaon (4) Gwalior
57.	Select the poisonous mushroom species among the following : (1) Cantharellus cibarius (2) Amanita phalloides (3) Morchella esculenta (4) Boletus edulis
58.	Pheny-2-propanone and formamide are used for the synthesis of : (1) Lysergide (2) Methamphetamine (3) Amphetamine (4) Methylene dioxymethamphetamine

Question No.	Questions
59.	<p>In the manufacture of glass, sodium carbonate is added to sand in order to :</p> <p>(1) Reduce its melting point (2) Prevent glass from dissolving in water (3) Reduce viscosity (4) Provide it greater durability</p>
60.	<p>Select among the following in which the slurry explosive are based on :</p> <p>(1) Potassium chlorate (2) Nitrocellulose (3) Nitroglycerine (4) Ammonium Nitrate</p>
61.	<p>Among the following which is not a feature of a female skull ?</p> <p>(1) Roundish shaped orbits (2) Prominent glabella (3) Prominent parietal eminence (4) Prominent frontal eminence</p>
62.	<p>Ashley's rule states that :</p> <p>(1) Total length of sternum in male is greater than 149 mm (2) Total length of sternum in female is greater than 149 mm (3) Sternal body is more than twice the manubrium in males (4) Sternal body is less than twice the manubrium in females</p>

Question No.	Questions
63.	Skull photo superimposition technique was used for the first time in which of the following cases ? (1) Ruxton murder case (2) Ted Bundy case (3) Frye case (4) Daubert case
64.	How many bones are there in appendicular skeleton of human body ? Select among the following : (1) 106 (2) 206 (3) 126 (4) 76
65.	Cusps of Carabelli are observed on : (1) Central Incisors (2) Canines (3) Bicuspid's (4) Tricuspid's
66.	Casper's dictum is used in relation to : (1) Mummification (2) Post mortem staining (3) Rigor mortis (4) Putrefaction
67.	The following is not a component of Gustafson's method : (1) Attrition (2) Dentition (3) Root resorption (4) Cementum Apposition
68.	Select the appropriate period of mixed dentition that extends between: (1) 4-10 years (2) 4-12 years (3) 6-12 years (4) 8-12 years

Question No.	Questions
69.	The greatest dimension of an incised wound is : (1) Length (2) Breadth (3) Depth (4) Breadth and depth are equal
70.	Post mortem staining in a dead body appears on : (1) Sides of the body (2) Upper parts of the body (3) Middle part of the body (4) Dependent parts of the body
71.	Chronograph is an instrument which measures the following in Forensic Ballistics ? (1) Angle of fire of a gun (2) Trajectory of the projectile (3) Velocity of the projectile (4) Temperature inside the barrel of gun
72.	In the analysis of striated tool marks, the spacings in between the striations change because of : (1) Nature of surface on which the tool acts (2) Angle of progression (3) Both angles of tilt and progression (4) Angle of tile

Question No.	Questions
73.	<p>Among the following which one is the most versatile detector :</p> <p>(1) FID (2) NIPD (3) MS detector (4) UV- detector</p>
74.	<p>What is the alternative test after failure of spermatozoa test for the identification of semen stains ?</p> <p>(1) Acid phosphatase test (2) Choline test (3) Thin layer chromatography (4) Prostate-specific antigen test</p>
75.	<p>Among the following which is the type of biological evidence that contains haploid cells ?</p> <p>(1) Saliva (2) Hair (3) Sperm (4) Blood</p>
76.	<p>Males having a low sperm count suffer from a condition known as :</p> <p>(1) Oligospermia (2) Necrospermia (3) Tertospermia (4) Aszopermia</p>
77.	<p>An examination of the development stages of the insects present on the decomposed corpse may yield valuable information about :</p> <p>(1) The age of the deceased (2) The circumstance surrounding the death (3) The identification of the deceased (4) The poison ingested by the deceased</p>

Question No.	Questions
78.	<p>The scientific name of Chiru is:</p> <p>(1) Antilope cervicapra (2) Pantholops hodgsonii (3) Capra aegagrus (4) Vulpes bengalensis</p>
79.	<p>Christmas Tree stain is used in the identification of :</p> <p>(1) Semen stains (2) Colostrum stains (3) Plant stains (4) Blood stains</p>
80.	<p>The offspring of two parents that are heterozygous for a given trait have a following percent chance of being homozygous for that trait :</p> <p>(1) 10% (2) 25% (3) 50% (4) 100%</p>
81.	<p>In the field of questioned document examination, the Instrument used and named as ESDA stands for:</p> <p>(1) Electrostatic device for detection of alteration (2) Electric system for detection of alteration (3) Electrostatic detection apparatus (4) Electronic state detection appliance</p>
82.	<p>Which of the following method is recommended to develop latent fingerprints on human skin :</p> <p>(1) DFO method (2) Silver-iodine plate transfer method (3) Ninhydrin method (4) Amio black method</p>

Question No.	Questions
83.	<p>The essentials of a fingerprint with loop pattern are :</p> <ol style="list-style-type: none">(1) A sufficient recurve, a core and a ridge count across a looping ridge(2) A sufficient recurve, a core, a ridge count(3) A sufficient recurve, a core and a delta(4) A sufficient recurve, a delta and minimum one ridge
84.	<p>The concept of Poroscopy was given by :</p> <ol style="list-style-type: none">(1) Hans Gross(2) Galton(3) Henry(4) Edmond Locard
85.	<p>The book entitled "The Forensic Science-the Basics" is Authored by :</p> <ol style="list-style-type: none">(1) Jay A Siegel(2) Paul Kirk(3) Osterburg and O'Hara(4) Saferstein
86.	<p>Among the following which one form the finger ridges :</p> <ol style="list-style-type: none">(1) Minutiae present of the fingers(2) Rows of sweat pores present(3) Dots or islands present(4) Dermal cells present
87.	<p>In case of amputation of one finger, the following print is considered in classification :</p> <ol style="list-style-type: none">(1) Index finger of other hand(2) Thumb impression of other hand(3) Corresponding finger of the other hand(4) Next finger of the same hand

Question No.	Questions
88.	Computerised fingerprints search systems match points by comparing : (1) Bifurcations present (2) Ridge endings (3) Both bifurcations and ridge endings (4) Dots present only
89.	Among the following which one does not constitute the fundamental principles of fingerprints : (1) Fingerprint is an individual (2) No two finger have identical ridge characteristics (3) Fingerprints are permanent in nature (4) Fingerprints/ characteristics follow Mendel's law of inheritance
90.	MCT detector is used in : (1) FTIR spectrometry (2) Atomic absorption spectrometry (AAS) (3) Gas-Chromatorgraphy-Mass spectrometry (GC-MS) (4) Liquid Chromatography-Mass spectrometry (LC-MS)
91.	Criminalistics can be defined as which of the following : (1) Application of Forensic Science to criminal investigation (2) Application of criminology to criminal investigation (3) Application of social sciences to criminal investigation (4) Application of social sciences to criminal investigation

Question No.	Questions
92.	<p>The word 'Forensic' word has been derived from :</p> <p>(1) Latin word Forensis (2) Greek word Forensis (3) French word (4) Roman word Forensis</p>
93.	<p>The principle global site of South Asia for opium production that constitute Golden Crescent are the following except :</p> <p>(1) Iran (2) Thailand (3) Pakistan (4) Afghanistan</p>
94.	<p>The "Journal of Forensic Sciences" is published by which of the following Academy ?</p> <p>(1) Indian Academy of Forensic Sciences India (2) American Academy of Forensic Science, USA (3) British Academy of Forensic Sciences, UK (4) European Academy of Forensic Sciences</p>
95.	<p>The first Serologist to the Government of India Department was established in :</p> <p>(1) 1910 (2) 1915 (3) 1947 (4) None of the above</p>
96.	<p>The first chemical examiner's laboratory was set up in India at which place among the following :</p> <p>(1) Mumbai (2) Madras (3) Kolkata (4) Agra</p>

(Set-“X”)

(DO NOT OPEN THIS QUESTION BOOKLET BEFORE TIME OR UNTIL YOU ARE ASKED TO DO SO)

(M.Phil/Ph.D/URS-EE-2018)

Code

C

Subject : FORENSIC SCIENCE

Sr. No. 100015

Time : 1¼ Hours

Max. Marks : 100

Total Questions : 100

Roll No. _____ (in figure) _____ (in words)

Name : _____ Father's Name : _____

Mother's Name : _____ Date of Examination : _____

(Signature of the candidate)

(Signature of the Invigilator)

**CANDIDATES MUST READ THE FOLLOWING INFORMATION/
INSTRUCTIONS BEFORE STARTING THE QUESTION PAPER.**

1. All questions are compulsory.
2. The candidates must return the Question book-let as well as OMR answer-sheet to the Invigilator concerned before leaving the Examination Hall, failing which a case of use of unfair-means / mis-behaviour will be registered against him / her, in addition to lodging of an FIR with the police. Further the answer-sheet of such a candidate will not be evaluated.
3. Keeping in view the transparency of the examination system, carbonless OMR Sheet is provided to the candidate so that a copy of OMR Sheet may be kept by the candidate.
4. Question Booklet along with answer key of all the A, B, C, D code will be got uploaded on the University website after the conduct of Entrance Examination. In case there is any discrepancy in the Question Booklet / Answer Key, the same may be brought to the notice of the Controller of Examination in writing / through E.Mail within 24 hours of uploading the same on the University Website. Thereafter, no complaint in any case, will be considered
5. The candidate MUST NOT do any rough work or writing in the OMR Answer-Sheet. Rough work, if any, may be done in the question book-let itself. Answers MUST NOT be ticked in the Question book-let.
6. There will be no Negative marking. Each correct answer will be awarded one full mark. Cutting, erasing, overwriting and more than one answer in OMR Answer-Sheet will be treated as incorrect answer.
7. Use only Black or Blue **BALL POINT PEN** of good quality in the OMR Answer-Sheet.
8. BEFORE ANSWERING THE QUESTIONS, THE CANDIDATES SHOULD ENSURE THAT THEY HAVE BEEN SUPPLIED CORRECT AND COMPLETE BOOK-LET. COMPLAINTS, IF ANY, REGARDING MISPRINTING ETC. WILL NOT BE ENTERTAINED 30 MINUTES AFTER STARTING OF THE EXAMINATION.

Question No.	Questions				
1.	<p>Chronograph is an instrument which measures the following in Forensic Ballistics ?</p> <ol style="list-style-type: none"> (1) Angle of fire of a gun (2) Trajectory of the projectile (3) Velocity of the projectile (4) Temperature inside the barrel of gun 				
2.	<p>In the analysis of striated tool marks, the spacings in between the striations change because of :</p> <ol style="list-style-type: none"> (1) Nature of surface on which the tool acts (2) Angle of progression (3) Both angles of tilt and progression (4) Angle of tile 				
3.	<p>Among the following which one is the most versatile detector :</p> <table style="width: 100%; border: none;"> <tr> <td style="width: 50%;">(1) FID</td> <td style="width: 50%;">(2) NIPD</td> </tr> <tr> <td>(3) MS detector</td> <td>(4) UV- detector</td> </tr> </table>	(1) FID	(2) NIPD	(3) MS detector	(4) UV- detector
(1) FID	(2) NIPD				
(3) MS detector	(4) UV- detector				
4.	<p>What is the alternative test after failure of spermatozoa test for the identification of semen stains ?</p> <ol style="list-style-type: none"> (1) Acid phosphatase test (2) Choline test (3) Thin layer chromatography (4) Prostate-specific antigen test 				

Question No.	Questions
5.	Among the following which is the type of biological evidence that contains haploid cells ? (1) Saliva (2) Hair (3) Sperm (4) Blood
6.	Males having a low sperm count suffer from a condition known as : (1) Oligospermia (2) Necrospermia (3) Tertospermia (4) Aszopermia
7.	An examination of the development stages of the insects present on the decomposed corpse may yield valuable information about : (1) The age of the deceased (2) The circumstance surrounding the death (3) The identification of the deceased (4) The poison ingested by the deceased
8.	The scientific name of Chiru is: (1) Antilope cervicapra (2) Pantholops hodgsonii (3) Capra aegagrus (4) Vulpes bengalensis
9.	Christmas Tree stain is used in the identification of : (1) Semen stains (2) Colostrum stains (3) Plant stains (4) Blood stains

Question No.	Questions
10.	<p>The offspring of two parents that are heterozygous for a given trait have a following percent chance of being homozygous for that trait :</p> <p>(1) 10% (2) 25% (3) 50% (4) 100%</p>
11.	<p>In the field of questioned document examination, the Instrument used and named as ESDA stands for:</p> <p>(1) Electrostatic device for detection of alteration (2) Electric system for detection of alteration (3) Electrostatic detection apparatus (4) Electronic state detection appliance</p>
12.	<p>Which of the following method is recommended to develop latent fingerprints on human skin :</p> <p>(1) DFO method (2) Silver-iodine plate transfer method (3) Ninhydrin method (4) Amio black method</p>
13.	<p>The essentials of a fingerprint with loop pattern are :</p> <p>(1) A sufficient recurve, a core and a ridge count across a looping ridge (2) A sufficient recurve, a core, a ridge count (3) A sufficient recurve, a core and a delta (4) A sufficient recurve, a delta and minimum one ridge</p>
14.	<p>The concept of Poroscopy was given by :</p> <p>(1) Hans Gross (2) Galton (3) Henry (4) Edmond Locard</p>

Question No.	Questions
15.	The book entitled "The Forensic Science-the Basics" is Authored by : (1) Jay A Siegel (2) Paul Kirk (3) Osterburg and O'Hara (4) Saferstein
16.	Among the following which one form the finger ridges : (1) Minutiae present of the fingers (2) Rows of sweat pores present (3) Dots or islands present (4) Dermal cells present
17.	In case of amputation of one finger, the following print is considered in classification : (1) Index finger of other hand (2) Thumb impression of other hand (3) Corresponding finger of the other hand (4) Next finger of the same hand
18.	Computerised fingerprints search systems match points by comparing : (1) Bifurcations present (2) Ridge endings (3) Both bifurcations and ridge endings (4) Dots present only

Question No.	Questions
19.	<p>Among the following which one does not constitute the fundamental principles of fingerprints :</p> <p>(1) Fingerprint is an individual</p> <p>(2) No two finger have identical ridge characteristics</p> <p>(3) Fingerprints are permanent in nature</p> <p>(4) Fingerprints/ characteristics follow Mendel's law of inheritance</p>
20.	<p>MCT detector is used in :</p> <p>(1) FTIR spectrometry</p> <p>(2) Atomic absorption spectrometry (AAS)</p> <p>(3) Gas-Chromatorgraphy-Mass spectrometry (GC-MS)</p> <p>(4) Liquid Chromatography-Mass spectrometry (LC-MS)</p>
21.	<p>Criminalistics can be defined as which of the following :</p> <p>(1) Application of Forensic Science to criminal investigation</p> <p>(2) Application of criminology to criminal investigation</p> <p>(3) Application of social sciences to criminal investigation</p> <p>(4) Application of social sciences to criminal investigation</p>
22.	<p>The word 'Forensic' word has been derived from :</p> <p>(1) Latin word Forensis (2) Greek word Forensis</p> <p>(3) French word (4) Roman word Forensis</p>

Question No.	Questions
23.	<p>The principle global site of South Asia for opium production that constitute Golden Crescent are the following except :</p> <p>(1) Iran (2) Thailand</p> <p>(3) Pakistan (4) Afghanistan</p>
24.	<p>The "Journal of Forensic Sciences" is published by which of the following Academy ?</p> <p>(1) Indian Academy of Forensic Sciences India</p> <p>(2) American Academy of Forensic Science, USA</p> <p>(3) British Academy of Forensic Sciences, UK</p> <p>(4) European Academy of Forensic Sciences</p>
25.	<p>The first Serologist to the Government of India Department was established in :</p> <p>(1) 1910 (2) 1915</p> <p>(3) 1947 (4) None of the above</p>
26.	<p>The first chemical examiner's laboratory was set up in India at which place among the following :</p> <p>(1) Mumbai (2) Madras</p> <p>(3) Kolkata (4) Agra</p>

Question No.	Questions
27.	<p>The first State Forensic Science Laboratory in India was established in the year :</p> <p>(1) 1948 (2) 1950</p> <p>(3) 1952 (4) 1948</p>
28.	<p>Dying Deposition is recorded by :</p> <p>(1) Relative of the victim (2) Medical Officer</p> <p>(3) Police Officer (4) Magistrate</p>
29.	<p>In India the second CFSL was established during the year 1965 at which place ?</p> <p>(1) Chandigarh (2) Kolkata</p> <p>(3) Hyderabad (4) Delhi</p>
30.	<p>NAAC is the organisation in the country that :</p> <p>(1) Assesses and accredits Forensic Labs</p> <p>(2) Assesses and accredits Hospitals</p> <p>(3) Assesses and accredits private labs only</p> <p>(4) Assesses and accredits higher education Institutions</p>
31.	<p>Identify the correct sequence of the closure of skull structure among the following :</p> <p>(1) Sagittal, Temporal, Metopic, Basal</p> <p>(2) Temporal, Basal, Metopic, Sagittal</p> <p>(3) Metopic, basal, Sagittal, Temporal</p> <p>(4) Basal, Temporal, Metopic, Sagittal</p>

Question No.	Questions
32.	Dilaudid is : (1) Synthetic Cocaine (2) Synthetic Morphine (3) Synthetic Codeine (4) Synthetic THC
33.	The objective of ISO-9000 family of quality management is : (1) Customer satisfaction (2) Employee satisfaction (3) Skill enhancement (4) Environmental issues
34.	Which of the following is the first step in starting the research process : (1) Searching sources of information to locate problem (2) Survey of related literature (3) Identification of problem (4) Searching for solutions to the problem
35.	According to the analysis of digital evidence, what should be the best practice ? (1) Forensic examination of performance directly (2) Design an examination process (3) Create one or more duplicates of the original evidences (4) The documentation and data reduction steps
36.	The most popular software forensic tools include all of the following except : (1) Forensic Toolkit (2) Forensic Autopsy (3) Smart (4) Quicken

Question No.	Questions
37.	Hash value is used by the forensic experts to : (1) To authenticate text data (2) To authenticate images in the given file (3) To authenticate audio/video files (4) To authenticate digital data
38.	Among the following which is the most sensitive technique to isolate petroleum products from different substrates : (1) Solvent extraction technique (2) Solid-phase micro extraction technique (3) Solid phase extraction technique (4) Acidic or alkali steam distillation
39.	Leading questions are not allowed in the examination-in-chief except when the witness is : (1) Hostile witness (2) Paid witness (3) Expert witness (4) Ordinary witness
40.	In the FTA method for collection of biological evidence during DNA analysis: (1) The DNA is eluted off the paper (2) The DNA stays on the paper (3) Cellular materials are washed away (4) FTA paper allows to dry the stain quickly

Question No.	Questions
41.	<p>'X' comes home unexpected and sees his wife in bed with 'Z'. He becomes furious and kills 'Z' with a knife which he finds on the shelf nearby. Which of the following crimes 'X' has committed ?</p> <p>(1) Death by rash and negligent act (2) Culpable homicide amounting to murder (3) Voluntary causing of grievous hurt (4) Culpable homicide not amounting to murder</p>
42.	<p>Which of the following can be used to extract acidic drugs from an aqueous solution ?</p> <p>(1) Methanol and Hydrochloric acid (2) Chloroform and acetic acid (3) Chloroform and ammonium hydroxide (4) Ethanol and Sodium hydroxide</p>
43.	<p>What colour Dilli-Koppanyi reagent gives with barbiturate ?</p> <p>(1) Reddish (2) Purple (3) Green (4) Yellow</p>
44.	<p>LSD is derived from which of the following plant ?</p> <p>(1) Cannabis sativa (2) Papaver somniferum (3) Erthroxyllum sp. (4) Claviceps purpurea</p>

Question No.	Questions
45.	Parathion is metabolized to which of the following product : (1) o-nitrophenol and ethyl phosphate (2) o-nitrophenol and methyl phosphate (3) p-nitrophenol and diethyl phosphate (4) m-nitrophenol and dimethyl phosphate
46.	The morphine content of opium is standardized in the Government opium factory located at : (1) Ghazipur (2) Ghaziabad (3) Gurgaon (4) Gwalior
47.	Select the poisonous mushroom species among the following : (1) Cantharellus cibarius (2) Amanita phalloides (3) Morchella esculenta (4) Boletus edulis
48.	Pheny-2-propanone and formamide are used for the synthesis of : (1) Lysergide (2) Methamphetamine (3) Amphetamine (4) Methylene dioxymethamphetamine

Question No.	Questions
49.	<p>In the manufacture of glass, sodium carbonate is added to sand in order to :</p> <p>(1) Reduce its melting point (2) Prevent glass from dissolving in water (3) Reduce viscosity (4) Provide it greater durability</p>
50.	<p>Select among the following in which the slurry explosive are based on :</p> <p>(1) Potassium chlorate (2) Nitrocellulose (3) Nitroglycerine (4) Ammonium Nitrate</p>
51.	<p>In case of scanning electron microscope, secondary electrons :</p> <p>(1) Are emitted by the nucleus of the various elements when the object is struck by a beam of X-rays (2) Are emitted when a beam of primary electrons strikes the object (3) Strike the object and then reflect off the surface (4) Strike the object releasing other electrons</p>
52.	<p>The "fingerprint" region of IR spectrum can be subdivided into the following except :</p> <p>(1) Below 500 cm⁻¹ (2) Below 1000 cm cm⁻¹ (3) 1350-1000 cm⁻¹ (4) 1500-1350 cm⁻¹</p>

Question No.	Questions
53.	<p>The "magic angle" of NMR is at :</p> <p>(1) 60.8 degrees (2) 120 degrees (3) 54.7 degrees (4) 90 degrees</p>
54.	<p>Among the following which of the following statements is Not true ?</p> <p>(1) Handwriting of an individual shows natural variations (2) Alcohol consumption may cause variations in one's handwriting (3) The handwriting of an individual remains unaffected by advancing age (4) The handwriting is affected by space available for writing and may show variations</p>
55.	<p>In Gas chromatography the basis for separations of the components is the difference in :</p> <p>(1) Partition coefficient (2) Conductivity (3) Molecular weight (4) Molarity</p>
56.	<p>Among the following which one is the major difference between gas chromatography (GC) and High pressure liquid Chromatography (HPLC):</p> <p>(1) HPLC always uses at least two liquids in its stationery phase (2) GC has a liquid mobile (3) GC uses columns to hold the mobile phase, whereas HPLC does not (4) GC columns are heated whereas HPLC columns are kept at room temperature</p>

Question No.	Questions
57.	<p>In polarized light microscope, a polarizer is placed :</p> <p>(1) Above the sample (2) Below the sample</p> <p>(3) Below the objective (4) Above the objective</p>
58.	<p>A dichroic mirror is an incorporation of optical accessory in :</p> <p>(1) Electron microscope</p> <p>(2) Fluorescence microscope</p> <p>(3) Simple microscope</p> <p>(4) Stereomicroscope</p>
59.	<p>Among the following techniques which gives more conclusive results for gun short residue detection in shooting cases :</p> <p>(1) Scanning electron microscope with energy dispersive analysis</p> <p>(2) Inductively coupled plasma (ICP)</p> <p>(3) Atomic absorption spectrometry (AAS)</p> <p>(4) Neutron activation analysis (NAA)</p>
60.	<p>Among the following in which methods, Hollow cathode lamps is used as radiation source :</p> <p>(1) Raman spectrophotometer</p> <p>(2) IR spectrophotometer</p> <p>(3) UV-Vis spectrophotometer</p> <p>(4) Atomic absorption spectrophotometer</p>

Question No.	Questions
61.	A plastic explosive 'Kirkee' is essentially the following explosive : (1) 2, 4, 6 Trinitrophenyl methyl nitramine (2) 2, 4, 6 Trinitrophenol (3) 2, 4, 6 Trinitrotoluene (4) Cyclo Trimethylene Trinitramine
62.	Which of the following statements is correct ? (1) Two or more persons may have similar DNA (2) Monozygotic twins have identical DNA (3) Two fingers cannot have identical fingerprints (4) Monozygotic twins have identical fingerprints
63.	.Numerous and short radial fractures in glass indicate that the hole has been caused by a : (1) Stone hurled at glass (2) A high velocity rifle bullet (3) A jacketed bullet fired from revolver (4) A lead bullet fired from revolver
64.	The diameter of 8 bore shot gun is : (1) 0.615 inch (2) 0.835 inch (3) 0.729 inch (4) 0.913 inch

Question No.	Questions
65.	<p>A technique used to separate sperm cells and non-sperm cells for DNA analysis in rape cases is called :</p> <p>(1) Chelex Extraction method (2) Organic Extraction method (3) QiaAmp Extraction method (4) Differential Extraction method</p>
66.	<p>Select the most appropriate answer that 7.62 mm AK-47 assault rifle has the magazine capacity of :</p> <p>(1) 20 (2) 25 (3) 30 (4) 40</p>
67.	<p>Walker test of GSR is done for the identification of the presence of :</p> <p>(1) Metallic residue (2) Nitrate (3) Sulphur (4) Nitrite</p>
68.	<p>Amatol contains which of the following ?</p> <p>(1) TNT and RDX (2) TNT and Teteryl (3) TNT and PETN (4) TNT and Ammonium nitrate</p>
69.	<p>Calculation of person's stature from fragmented bones is done :</p> <p>(1) Steele and Mc Kern's formula (2) Pearson's formula (3) Trotter and Glesser formula (4) Depertuis and Hadden's formula</p>

Question No.	Questions
70.	<p>In sex determination from female pelvis all the characteristics are present except :</p> <p>(1) Sub pubic angle is 'V' shaped (2) Greater sciatic notch is wide and shallow (3) Pre-auricular sulcus is prominent (4) Ischial tuberosity is everted</p>
71.	<p>Among the following which is not a feature of a female skull ?</p> <p>(1) Roundish shaped orbits (2) Prominent glabella (3) Prominent parietal eminence (4) Prominent frontal eminence</p>
72.	<p>Ashley's rule states that :</p> <p>(1) Total length of sternum in male is greater than 149 mm (2) Total length of sternum in female is greater than 149 mm (3) Sternal body is more than twice the manubrium in males (4) Sternal body is less than twice the manubrium in females</p>
73.	<p>Skull photo superimposition technique was used for the first time in which of the following cases ?</p> <p>(1) Ruxton murder case (2) Ted Bundy case (3) Frye case (4) Daubert case</p>

Question No.	Questions
80.	Post mortem staining in a dead body appears on : (1) Sides of the body (2) Upper parts of the body (3) Middle part of the body (4) Dependent parts of the body
81.	NIA Stands for : (1) National Investigation Agency (2) National Intelligence Agency (3) National Investigation authority (4) National Interrogation Agency
82.	Among the following the first American serial Killer, Ted Bundy was convicted on the basis of : (1) DNA Profiling evidence (2) Bite marks evidence (3) Toxicological evidence (4) Latent Fingerprints
83.	The first crime laboratory was established in France by Edmond Locard in the year : (1) 1910 (2) 1912 (3) 1906 (4) 1915

Question No.	Questions
84.	<p>According to the principles/Laws of Forensic Science which emphasizes the necessity of correct sampling and packing for the effective use of experts ?</p> <p>(1) Law of individuality (2) Principle of mutual exchange (3) Principle of comparison (4) Principle of Analysis</p>
85.	<p>Which of the following technique is most commonly used to record measurements for the crime scene sketches :</p> <p>(1) Triangulation (2) Baseline (3) Computer-aided design (4) Polar coordinates</p>
86.	<p>In case of Bank robbery as a Forensic expert which of the following method of crime scene search method will be used :</p> <p>(1) Spiral method (2) Zonal method (3) Strip method (4) Grid method</p>
87.	<p>Sinistrality means :</p> <p>(1) An Ambidextrous individual (2) Right handedness (3) Left handedness (4) Hypodactylic individual</p>

Question No.	Questions
88.	Diacritical marks are : (1) Blotting of ink (2) Marks used with letter or groups of letters (3) Punctuations (4) Embellishments
89.	Among the four places in India where the bank currency notes are printed, select which of the following is not amongst them ? (1) Guntur, Andhra Pradesh (2) Salboni, West Bengal (3) Nashik, Maharashtra (4) Dewas, Madhya Pradesh
90.	The best Preservative for the charred documents is : (1) Poly vinyl chloride solution (2) Poly vinyl acetate (3) Poly vinyl carbonate (4) Formalin
91.	The Azlon fibres are of the type of : (1) Regenerated fibres (2) Synthetic fibres (3) Animal fibres (4) Natural fibres

Question No.	Questions				
92.	<p>The instrumental analyses most useful for identification of synthetic fibres are :</p> <ol style="list-style-type: none"> (1) Infrared spectrophotometer and Pyrolysis-gas-chromatography (2) Pyrolysis and atomic absorption spectrophotometry (3) Mass spectrometry and emission spectrophotometry (4) X-rays diffraction and gas chromatography 				
93.	<p>Dried blood stains are typed primarily by means of :</p> <ol style="list-style-type: none"> (1) Absorption elution (2) Absorption-inhibition (3) Mixed agglutination (4) Adding anti-A and anti-B antisera to the stain 				
94.	<p>If a father's genotype is 'OO' and a mother's genotype is BB, their children:</p> <ol style="list-style-type: none"> (1) Have a 25 percent chance of having type B blood (2) Have a 50 percent chance of having type "O" blood (3) Will all have type 'O' (4) Will all have type B blood 				
95.	<p>One nanogram (ng) of DNA can be obtained from approximately :</p> <table border="0" style="width: 100%;"> <tr> <td>(1) 900-1000 diploid cells</td> <td>(2) 600-700 diploid cells</td> </tr> <tr> <td>(3) 300-400 diploid cells</td> <td>(4) 100-200 diploid cells</td> </tr> </table>	(1) 900-1000 diploid cells	(2) 600-700 diploid cells	(3) 300-400 diploid cells	(4) 100-200 diploid cells
(1) 900-1000 diploid cells	(2) 600-700 diploid cells				
(3) 300-400 diploid cells	(4) 100-200 diploid cells				
96.	<p>Among the following which is the order of steps in PCR cycling :</p> <ol style="list-style-type: none"> (1) Denaturation, annealing and extension (2) Annealing, denaturation and extension (3) Extension, denaturation and annealing (4) Annealing, denaturation and extension 				

Question No.	Questions
97.	<p>Comparing SNP markers to STR based analysis, which of the following are true ?</p> <p>(1) There are many more STR Loci in the genome</p> <p>(2) There are many more SNP markers in the human genome than STR</p> <p>(3) SNP loci generally have more alleles than STR loci</p> <p>(4) The number of SNP loci is about the same as the number of STR loci in the genome</p>
98.	<p>Single-stranded DNA molecules that can bind to and be used to detect other DNA molecules are called :</p> <p>(1) Primers (2) Lines</p> <p>(3) STR (4) Probes</p>
99.	<p>Single nucleotide polymorphism :</p> <p>(1) Can be useful for degraded DNA samples</p> <p>(2) Can be useful for mixed samples from more than one donor</p> <p>(3) Can be useful for forensic identification because of high discriminating power</p> <p>(4) Most DNA databases of SNP profiles exists</p>
100.	<p>What is the scientific/ chemical name of Meow meow's drug ?</p> <p>(1) Amphetamines (2) Mephedrone</p> <p>(3) MDMA (4) Cathinone</p>

(Set-“X”)

(DO NOT OPEN THIS QUESTION BOOKLET BEFORE TIME OR UNTIL YOU ARE ASKED TO DO SO)

(M.Phil/Ph.D/URS-EE-2018)

Code **D**

Subject : FORENSIC SCIENCE

Sr. No. 100024

Time : 1¼ Hours

Max. Marks : 100

Total Questions : 100

Roll No. _____ (in figure) _____ (in words)

Name : _____ Father's Name : _____

Mother's Name : _____ Date of Examination : _____

(Signature of the candidate)

(Signature of the Invigilator)

CANDIDATES MUST READ THE FOLLOWING INFORMATION/ INSTRUCTIONS BEFORE STARTING THE QUESTION PAPER.

1. All questions are compulsory.
2. The candidates must return the Question book-let as well as OMR answer-sheet to the Invigilator concerned before leaving the Examination Hall, failing which a case of use of unfair-means / mis-behaviour will be registered against him / her, in addition to lodging of an FIR with the police. Further the answer-sheet of such a candidate will not be evaluated.
3. Keeping in view the transparency of the examination system, carbonless OMR Sheet is provided to the candidate so that a copy of OMR Sheet may be kept by the candidate.
4. Question Booklet along with answer key of all the A, B, C, D code will be got uploaded on the University website after the conduct of Entrance Examination. In case there is any discrepancy in the Question Booklet / Answer Key, the same may be brought to the notice of the Controller of Examination in writing / through E.Mail within 24 hours of uploading the same on the University Website. Thereafter, no complaint in any case, will be considered
5. The candidate MUST NOT do any rough work or writing in the OMR Answer-Sheet. Rough work, if any, may be done in the question book-let itself. Answers MUST NOT be ticked in the Question book-let.
6. **There will be no Negative marking. Each correct answer will be awarded one full mark. Cutting, erasing, overwriting and more than one answer in OMR Answer-Sheet will be treated as incorrect answer.**
7. Use only Black or Blue **BALL POINT PEN** of good quality in the OMR Answer-Sheet.
8. **BEFORE ANSWERING THE QUESTIONS, THE CANDIDATES SHOULD ENSURE THAT THEY HAVE BEEN SUPPLIED CORRECT AND COMPLETE BOOK-LET. COMPLAINTS, IF ANY, REGARDING MISPRINTING ETC. WILL NOT BE ENTERTAINED 30 MINUTES AFTER STARTING OF THE EXAMINATION.**

Question No.	Questions
5.	<p>Which of the following technique is most commonly used to record measurements for the crime scene sketches :</p> <p>(1) Triangulation (2) Baseline (3) Computer-aided design (4) Polar coordinates</p>
6.	<p>In case of Bank robbery as a Forensic expert which of the following method of crime scene search method will be used :</p> <p>(1) Spiral method (2) Zonal method (3) Strip method (4) Grid method</p>
7.	<p>Sinistrality means :</p> <p>(1) An Ambidextrous individual (2) Right handedness (3) Left handedness (4) Hypodactylic individual</p>
8.	<p>Diacritical marks are :</p> <p>(1) Blotting of ink (2) Marks used with letter or groups of letters (3) Punctuations (4) Embellishments</p>

Question No.	Questions
9.	<p>Among the four places in India where the bank currency notes are printed, select which of the following is not amongst them ?</p> <p>(1) Guntur, Andhra Pradesh (2) Salboni, West Bengal (3) Nashik, Maharashtra (4) Dewas, Madhya Pradesh</p>
10.	<p>The best Preservative for the charred documents is :</p> <p>(1) Poly vinyl chloride solution (2) Poly vinyl acetate (3) Poly vinyl carbonate (4) Formalin</p>
11.	<p>Identify the correct sequence of the closure of skull structure among the following :</p> <p>(1) Sagittal, Temporal, Metopic, Basal (2) Temporal, Basal, Metopic, Sagittal (3) Metopic, basal, Sagittal, Temporal (4) Basal, Temporal, Metopic, Sagittal</p>
12.	<p>Dilaudid is :</p> <p>(1) Synthetic Cocaine (2) Synthetic Morphine (3) Synthetic Codeine (4) Synthetic THC</p>

Question No.	Questions
13.	<p>The objective of ISO-9000 family of quality management is :</p> <p>(1) Customer satisfaction (2) Employee satisfaction</p> <p>(3) Skill enhancement (4) Environmental issues</p>
14.	<p>Which of the following is the first step in starting the research process :</p> <p>(1) Searching sources of information to locate problem</p> <p>(2) Survey of related literature</p> <p>(3) Identification of problem</p> <p>(4) Searching for solutions to the problem</p>
15.	<p>According to the analysis of digital evidence, what should be the best practice ?</p> <p>(1) Forensic examination of performance directly</p> <p>(2) Design an examination process</p> <p>(3) Create one or more duplicates of the original evidences</p> <p>(4) The documentation and data reduction steps</p>
16.	<p>The most popular software forensic tools include all of the following except :</p> <p>(1) Forensic Toolkit (2) Forensic Autopsy</p> <p>(3) Smart (4) Quicken</p>

Question No.	Questions				
17.	<p>Hash value is used by the forensic experts to :</p> <ol style="list-style-type: none"> (1) To authenticate text data (2) To authenticate images in the given file (3) To authenticate audio/video files (4) To authenticate digital data 				
18.	<p>Among the following which is the most sensitive technique to isolate petroleum products from different substrates :</p> <ol style="list-style-type: none"> (1) Solvent extraction technique (2) Solid-phase micro extraction technique (3) Solid phase extraction technique (4) Acidic or alkali steam distillation 				
19.	<p>Leading questions are not allowed in the examination-in-chief except when the witness is :</p> <table style="width: 100%; border: none;"> <tr> <td style="width: 50%;">(1) Hostile witness</td> <td style="width: 50%;">(2) Paid witness</td> </tr> <tr> <td>(3) Expert witness</td> <td>(4) Ordinary witness</td> </tr> </table>	(1) Hostile witness	(2) Paid witness	(3) Expert witness	(4) Ordinary witness
(1) Hostile witness	(2) Paid witness				
(3) Expert witness	(4) Ordinary witness				
20.	<p>In the FTA method for collection of biological evidence during DNA analysis:</p> <ol style="list-style-type: none"> (1) The DNA is eluted off the paper (2) The DNA stays on the paper (3) Cellular materials are washed away (4) FTA paper allows to dry the stain quickly 				

Question No.	Questions
21.	<p>A plastic explosive 'Kirkee' is essentially the following explosive :</p> <ul style="list-style-type: none">(1) 2, 4, 6 Trinitropheny methyl nitramine(2) 2, 4, 6 Trinitrophenol(3) 2, 4, 6 Trinitrotoluene(4) Cyclo Trimethylene Trinitramine
22.	<p>Which of the following statements is correct ?</p> <ul style="list-style-type: none">(1) Two or more persons may have similar DNA(2) Monozygotic twins have identical DNA(3) Two fingers cannot have identical fingerprints(4) Monozygotic twins have identical fingerprints
23.	<p>.Numerous and short radial fractures in glass indicate that the hole has been caused by a :</p> <ul style="list-style-type: none">(1) Stone hurled at glass(2) A high velocity rifle bullet(3) A jacketed bullet fired from revolver(4) A lead bullet fired from revolver
24.	<p>The diameter of 8 bore shot gun is :</p> <ul style="list-style-type: none">(1) 0.615 inch(2) 0.835 inch(3) 0.729 inch(4) 0.913 inch

Question No.	Questions
25.	A technique used to separate sperm cells and non-sperm cells for DNA analysis in rape cases is called : (1) Chelex Extraction method (2) Organic Extraction method (3) QiaAmp Extraction method (4) Differential Extraction method
26.	Select the most appropriate answer that 7.62 mm AK-47 assault rifle has the magazine capacity of : (1) 20 (2) 25 (3) 30 (4) 40
27.	Walker test of GSR is done for the identification of the presence of : (1) Metallic residue (2) Nitrate (3) Sulphur (4) Nitrite
28.	Amatol contains which of the following ? (1) TNT and RDX (2) TNT and Tetryl (3) TNT and PETN (4) TNT and Ammonium nitrate
29.	Calculation of person's stature from fragmented bones is done : (1) Steele and Mc Kern's formula (2) Pearson's formula (3) Trotter and Glesser formula (4) Depertuis and Hadden's formula

Question No.	Questions
30.	<p>In sex determination from female pelvis all the characteristics are present except :</p> <p>(1) Sub pubic angle is 'V' shaped (2) Greater sciatic notch is wide and shallow (3) Pre-auricular sulcus is prominent (4) Ischial tuberosity is everted</p>
31.	<p>The Azlon fibres are of the type of :</p> <p>(1) Regenerated fibres (2) Synthetic fibres (3) Animal fibres (4) Natural fibres</p>
32.	<p>The instrumental analyses most useful for identification of synthetic fibres are :</p> <p>(1) Infrared spectrophotometer and Pyrolysis-gas-chromatography (2) Pyrolysis and atomic absorption spectrophotometry (3) Mass spectrometry and emission spectrophotometry (4) X-rays diffraction and gas chromatography</p>
33.	<p>Dried blood stains are typed primarily by means of :</p> <p>(1) Absorption elution (2) Absorption-inhibition (3) Mixed agglutination (4) Adding anti-A and anti-B antisera to the stain</p>

Question No.	Questions
34.	If a father's genotype is 'OO' and a mother's genotype is BB, their children: (1) Have a 25 percent chance of having type B blood (2) Have a 50 percent chance of having type "O" blood (3) Will all have type 'O' (4) Will all have type B blood
35.	One nanogram (ng) of DNA can be obtained from approximately : (1) 900-1000 diploid cells (2) 600-700 diploid cells (3) 300-400 diploid cells (4) 100-200 diploid cells
36.	Among the following which is the order of steps in PCR cycling : (1) Denaturation, annealing and extension (2) Annealing, denaturation and extension (3) Extension, denaturation and anealing (4) Annealing, denaturation and extension
37.	Comparing SNP markers to STR based analysis, which of the following are true ? (1) There are many more STR Loci in the genome (2) There are many more SNP markers in the human genome than STR (3) SNP loci generally have more alleles than STR loci (4) The number of SNP loci is about the same as the number of STR loci in the genome

Question No.	Questions
38.	Single-stranded DNA molecules that can bind to and be used to detect other DNA molecules are called : (1) Primers (2) Lines (3) STR (4) Probes
39.	Single nucleotide polymorphism : (1) Can be useful for degraded DNA samples (2) Can be useful for mixed samples from more than one donor (3) Can be useful for forensic identification because of high discriminating power (4) Most DNA databases of SNP profiles exists
40.	What is the scientific/ chemical name of Meow meow's drug ? (1) Amphetamines (2) Mephedrone (3) MDMA (4) Cathinone
41.	In case of scanning electron microscope, secondary electrons : (1) Are emitted by the nucleus of the various elements when the object is struck by a beam of X-rays (2) Are emitted when a beam of primary electrons strikes the object (3) Strike the object and then reflect off the surface (4) Strike the object releasing other electrons

Question No.	Questions
42.	<p>The "fingerprint" region of IR spectrum can be subdivided into the following except :</p> <p>(1) Below 500 cm⁻¹ (2) Below 1000 cm cm⁻¹ (3) 1350-1000 cm⁻¹ (4) 1500-1350 cm⁻¹</p>
43.	<p>The "magic angle" of NMR is at :</p> <p>(1) 60.8 degrees (2) 120 degrees (3) 54.7 degrees (4) 90 degrees</p>
44.	<p>Among the following which of the following statements is Not true ?</p> <p>(1) Handwriting of an individual shows natural variations (2) Alcohol consumption may cause variations in one's handwriting (3) The handwriting of an individual remains unaffected by advancing age (4) The handwriting is affected by space available for writing and may show variations</p>
45.	<p>In Gas chromatography the basis for separations of the components is the difference in :</p> <p>(1) Partition coefficient (2) Conductivity (3) Molecular weight (4) Molarity</p>

Question No.	Questions
46.	<p>Among the following which one is the major difference between gas chromatography (GC) and High pressure liquid Chromatography (HPLC):</p> <p>(1) HPLC always uses at least two liquids in its stationary phase (2) GC has a liquid mobile (3) GC uses columns to hold the mobile phase, whereas HPLC does not (4) GC columns are heated whereas HPLC columns are kept at room temperature</p>
47.	<p>In polarized light microscope, a polarizer is placed :</p> <p>(1) Above the sample (2) Below the sample (3) Below the objective (4) Above the objective</p>
48.	<p>A dichroic mirror is an incorporation of optical accessory in :</p> <p>(1) Electron microscope (2) Fluorescence microscope (3) Simple microscope (4) Stereomicroscope</p>
49.	<p>Among the following techniques which gives more conclusive results for gun short residue detection in shooting cases :</p> <p>(1) Scanning electron microscope with energy dispersive analysis (2) Inductively coupled plasma (ICP) (3) Atomic absorption spectrometry (AAS) (4) Neutron activation analysis (NAA)</p>

Question No.	Questions
50.	<p>Among the following in which methods, Hollow cathode lamps is used as radiation source :</p> <p>(1) Raman spectrophotometer (2) IR spectrophotometer (3) UV-Vis spectrophotometer (4) Atomic absorption spectrophotometer</p>
51.	<p>In the field of questioned document examination, the Instrument used and named as ESDA stands for:</p> <p>(1) Electrostatic device for detection of alteration (2) Electric system for detection of alteration (3) Electrostatic detection apparatus (4) Electronic state detection appliance</p>
52.	<p>Which of the following method is recommended to develop latent fingerprints on human skin :</p> <p>(1) DFO method (2) Silver-iodine plate transfer method (3) Ninhydrin method (4) Amio black method</p>
53.	<p>The essentials of a fingerprint with loop pattern are :</p> <p>(1) A sufficient recurve, a core and a ridge count across a looping ridge (2) A sufficient recurve, a core, a ridge count (3) A sufficient recurve, a core and a delta (4) A sufficient recurve, a delta and minimum one ridge</p>

Question No.	Questions
54.	The concept of Poroscopy was given by : (1) Hans Gross (2) Galton (3) Henry (4) Edmond Locard
55.	The book entitled "The Forensic Science-the Basics" is Authored by : (1) Jay A Siegel (2) Paul Kirk (3) Osterburg and O'Hara (4) Saferstein
56.	Among the following which one form the finger ridges : (1) Minutiae present of the fingers (2) Rows of sweat pores present (3) Dots or islands present (4) Dermal cells present
57.	In case of amputation of one finger, the following print is considered in classification : (1) Index finger of other hand (2) Thumb impression of other hand (3) Corresponding finger of the other hand (4) Next finger of the same hand
58.	Computerised fingerprints search systems match points by comparing : (1) Bifurcations present (2) Ridge endings (3) Both bifurcations and ridge endings (4) Dots present only

Question No.	Questions
59.	<p>Among the following which one does not constitute the fundamental principles of fingerprints :</p> <ol style="list-style-type: none"> (1) Fingerprint is an individual (2) No two finger have identical ridge characteristics (3) Fingerprints are permanent in nature (4) Fingerprints/ characteristics follow Mendel's law of inheritance
60.	<p>MCT detector is used in :</p> <ol style="list-style-type: none"> (1) FTIR spectrometry (2) Atomic absorption spectrometry (AAS) (3) Gas-Chromatorgraphy-Mass spectrometry (GC-MS) (4) Liquid Chromatography-Mass spectrometry (LC-MS)
61.	<p>Chronograph is an instrument which measures the following in Forensic Ballistics ?</p> <ol style="list-style-type: none"> (1) Angle of fire of a gun (2) Trajectory of the projectile (3) Velocity of the projectile (4) Temperature inside the barrel of gun
62.	<p>In the analysis of striated tool marks, the spacings in between the striations change because of :</p> <ol style="list-style-type: none"> (1) Nature of surface on which the tool acts (2) Angle of progression (3) Both angles of tilt and progression (4) Angle of tile

Question No.	Questions
63.	Among the following which one is the most versatile detector : (1) FID (2) NIPD (3) MS detector (4) UV- detector
64.	What is the alternative test after failure of spermatozoa test for the identification of semen stains ? (1) Acid phosphatase test (2) Choline test (3) Thin layer chromatography (4) Prostate-specific antigen test
65.	Among the following which is the type of biological evidence that contains haploid cells ? (1) Saliva (2) Hair (3) Sperm (4) Blood
66.	Males having a low sperm count suffer from a condition known as : (1) Oligospermia (2) Necrospermia (3) Tertospermia (4) Aszopermia
67.	An examination of the development stages of the insects present on the decomposed corpse may yield valuable information about : (1) The age of the deceased (2) The circumstance surrounding the death (3) The identification of the deceased (4) The poison ingested by the deceased

Question No.	Questions
68.	<p>The scientific name of Chiru is:</p> <p>(1) Antilope cervicapra (2) Pantholops hodgsonii (3) Capra aegagrus (4) Vulpes bengalensis</p>
69.	<p>Christmas Tree stain is used in the identification of :</p> <p>(1) Semen stains (2) Colostrum stains (3) Plant stains (4) Blood stains</p>
70.	<p>The offspring of two parents that are heterozygous for a given trait have a following percent chance of being homozygous for that trait :</p> <p>(1) 10% (2) 25% (3) 50% (4) 100%</p>
71.	<p>'X' comes home unexpected and sees his wife in bed with 'Z'. He becomes furious and kills 'Z' with a knife which he finds on the shelf nearby. Which of the following crimes 'X' has committed ?</p> <p>(1) Death by rash and negligent act (2) Culpable homicide amounting to murder (3) Voluntary causing of grievous hurt (4) Culpable homicide not amounting to murder</p>
72.	<p>Which of the following can be used to extract acidic drugs from an aqueous solution ?</p> <p>(1) Methanol and Hydrochloric acid (2) Chloroform and acetic acid (3) Chloroform and ammonium hydroxide (4) Ethanol and Sodium hydroxide</p>

Question No.	Questions
73.	What colour Dilli-Koppanyi reagent gives with barbiturate ? (1) Reddish (2) Purple (3) Green (4) Yellow
74.	LSD is derived from which of the following plant ? (1) Cannabis sativa (2) Papaver somniferum (3) Erthroxyllum sp. (4) Claviceps purpurea
75.	Parathion is metabolized to which of the following product : (1) o-nitrophenol and ethyl phosphate (2) o-nitrophenol and methyl phosphate (3) p-nitrophenol and diethyl phosphate (4) m-nitrophenol and dimethyl phosphate
76.	The morphine content of opium is standardized in the Government opium factory located at : (1) Ghazipur (2) Ghaziabad (3) Gurgaon (4) Gwalior
77.	Select the poisonous mushroom species among the following : (1) Cantharellus cibarius (2) Amanita phalloides (3) Morchella esculenta (4) Boletus edulis

Question No.	Questions
78.	Pheny-2-propanone and formamide are used for the synthesis of : (1) Lysergide (2) Methamphetamine (3) Amphetamine (4) Methylene dioxymethamphetamine
79.	In the manufacture of glass, sodium carbonate is added to sand in order to : (1) Reduce its melting point (2) Prevent glass from dissolving in water (3) Reduce viscosity (4) Provide it greater durability
80.	Select among the following in which the slurry explosive are based on : (1) Potassium chlorate (2) Nitrocellulose (3) Nitroglycerine (4) Ammonium Nitrate
81.	Criminalistics can be defined as which of the following : (1) Application of Forensic Science to criminal investigation (2) Application of criminology to criminal investigation (3) Application of social sciences to criminal investigation (4) Application of social sciences to criminal investigation

Question No.	Questions
82.	<p>The word 'Forensic' word has been derived from :</p> <p>(1) Latin word Forensis (2) Greek word Forensis (3) French word (4) Roman word Forensis</p>
83.	<p>The principle global site of South Asia for opium production that constitute Golden Crescent are the following except :</p> <p>(1) Iran (2) Thailand (3) Pakistan (4) Afghanistan</p>
84.	<p>The "Journal of Forensic Sciences" is published by which of the following Academy ?</p> <p>(1) Indian Academy of Forensic Sciences India (2) American Academy of Forensic Science, USA (3) British Academy of Forensic Sciences, UK (4) European Academy of Forensic Sciences</p>
85.	<p>The first Serologist to the Government of India Department was established in :</p> <p>(1) 1910 (2) 1915 (3) 1947 (4) None of the above</p>
86.	<p>The first chemical examiner's laboratory was set up in India at which place among the following :</p> <p>(1) Mumbai (2) Madras (3) Kolkata (4) Agra</p>

Question No.	Questions
87.	The first State Forensic Science Laboratory in India was established in the year : (1) 1948 (2) 1950 (3) 1952 (4) 1948
88.	Dying Deposition is recorded by : (1) Relative of the victim (2) Medical Officer (3) Police Officer (4) Magistrate
89.	In India the second CFSL was established during the year 1965 at which place ? (1) Chandigarh (2) Kolkata (3) Hyderabad (4) Delhi
90.	NAAC is the organisation in the country that : (1) Assesses and accredits Forensic Labs (2) Assesses and accredits Hospitals (3) Assesses and accredits private labs only (4) Assesses and accredits higher education Institutions
91.	Among the following which is not a feature of a female skull ? (1) Roundish shaped orbits (2) Prominent glabella (3) Prominent parietal eminence (4) Prominent frontal eminence

Question No.	Questions
92.	<p>Ashley's rule states that :</p> <p>(1) Total length of sternum in male is greater than 149 mm</p> <p>(2) Total length of sternum in female is greater than 149 mm</p> <p>(3) Sternal body is more than twice the manubrium in males</p> <p>(4) Sternal body is less than twice the manubrium in females</p>
93.	<p>Skull photo superimposition technique was used for the first time in which of the following cases ?</p> <p>(1) Ruxton murder case (2) Ted Bundy case</p> <p>(3) Frye case (4) Daubert case</p>
94.	<p>How many bones are there in appendicular skeleton of human body ? Select among the following :</p> <p>(1) 106 (2) 206</p> <p>(3) 126 (4) 76</p>
95.	<p>Cusps of Carabelli are observed on :</p> <p>(1) Central Incisors (2) Canines</p> <p>(3) Bicuspid (4) Tricuspid</p>
96.	<p>Casper's dictum is used in relation to :</p> <p>(1) Mummification (2) Post mortem staining</p> <p>(3) Rigor mortis (4) Putrefaction</p>

Question No.	Questions
97.	The following is not a component of Gustafson's method : (1) Attrition (2) Dentition (3) Root resorption (4) Cementum Apposition
98.	Select the appropriate period of mixed dentition that extends between: (1) 4-10 years (2) 4-12 years (3) 6-12 years (4) 8-12 years
99.	The greatest dimension of an incised wound is : (1) Length (2) Breadth (3) Depth (4) Breadth and depth are equal
100.	Post mortem staining in a dead body appears on : (1) Sides of the body (2) Upper parts of the body (3) Middle part of the body (4) Dependent parts of the body

Maharshi Dayanand University Rohtak
Department of Genetics
Answer Key for PhD/URS Entrance Test in Forensic Science (Nov, 2018)
