

All are cordially invited to 2-days Online Seminar
on
**Vedic Village and City Planning-A Sustainable Solution to Global Peace
and Prosperity**

To be organized by

**Maharshi Dayanand Saraswati Chair,
Maharshi Dayanand University, Rohtak**

Maharshi Dayanand Saraswati
(1824-1883)

Date and Time of Seminar

January 26, 2022 – January 27, 2022

Indian Time: 7:00 PM to 9:00 PM

Mauritius Time: 5:30 PM to 7:30 PM

US New York Time: 8:30 AM to 10:30 PM

Canada (Ottawa) Time: 8:30 AM to 10:30 AM

UK Time: 1:30 PM to 3:30 PM

Germany Time: 2:30 PM to 4:30 PM

Australian Time: 12:30 AM to 2:30 AM (Next day)

South African Time: 3:30 PM to 5:30 PM

Trinidad & Tobago Time: 9:30 AM to 11:30 PM

Suriname Time: 10:30 AM to 12:30 PM

Registration is Free

Registration Link for this Seminar: <https://forms.gle/P16EoZte2ULtVoNE7>

Google meet link for this Seminar: <https://meet.google.com/som-vsgq-bzb>

**Maharshi Dayanand Saraswati Chair (UGC)
Maharshi Dayanand University, Rohtak, Haryana**

COLLABORATORS

International Foundation for Vedic Science, Canada
Rishi Dayanand Institute, Mauritius
Arya Sabha of Mauritius
Nadi Vaidya Kayakalpa, India
Indian Foundation for Vedic Science, India
Arya Pratinidhi Sabha of Trinidad
Arya Samaj South Africa
Arya Pratinidhi Sabha of Fiji
Arya Diwakar, Suriname (South America)
Arya Pratinidhi Sabha & Arya Samaj of Melbourne Inc.
Arya Samaj Netherlands
Guyana Central Arya Samaj

Maharshi Dayanand Saraswati Chair (UGC)
Maharshi Dayanand University, Rohtak, Haryana

Introduction: In the present world scenario, the causes of the distressing climate change, pollution, pandemic (Corona), terrorism, personal and social problems, in the light of *Vedic* sciences, are – the combustion of petroleum products, the disposal of sewage and industrial waste into water, the release of inconsistent vibrations into the atmosphere, unlimited / over populated towns and cities, and heavy machinery. Living in self dependent, properly sized sectors (villages) surrounded by forest, the use of animal powered small machines, and the man of character (via *Vedic* education) solve all these problems. Engineering, medicine, and defence can still be achieved with the environmental friendly *Vedic* science and technology. This is the only sustainable solution to global peace and prosperity.

Significance : **Global warming** is clearly visible by the use of air fans in traditionally cold regions, the melting of the glaciers and increasing wild fires. Cyclones and heavy rains are occurring at improper times. Many regions are having rains much less and much more than the normal. Climate change (The Intergovernmental Panel on Climate Change, 2019) has adverse affect on men, animals, birds, and sea creatures alike (United Nations - Climate Change Poses a Threat to our Oceans, 2021). Shortage of drinking water and healthy food, air & water pollution, and various diseases (blood pressure, diabetes, mental stress etc.) are common. Every day men, women, and children are being killed by terrorists and viruses (**Corona etc.**). Scientists are alarming the dooms day (The Doomsday Clock Announcement, 2020). Distressed man wants to abandon this earth and go to Mars (Simon Worrall, 2018). This will be the pursuit of a brainless coward. The intelligent brave's duty is to find the cause and solve the problem.

Outcome: Our nation and this earth will again become a paradise by living in self dependent proper sized villages surrounded by forest, using small machines run by animal power or solar or geothermal power energy, and performing “*yajna*”. The present day over size / over populated cities, the use of petroleum products for power, large scale & heavy industries, and high frequency electromagnetic waves for communication have to go. There is no need to run away to a different planet to solve our present day problems.

Solar energy coupled with the use of electric vehicles will eliminate air pollution and the excessive use of oxygen. However, it is a temporary solution. Various personal and social problems crop up in over sized towns and cities. Administration and control become very difficult. The use of solar plants also leads to problems in course of time. The forest around the village is, in fact, nourished by solar energy. They also generate life giving oxygen. Therefore, living in a **proper size village** surrounded by **forest** and the use of **small machines** run by **animal power*** is the **sustainable** solution to **climate change** and **other problems** faced by humanity. Man needs pure air to breath, clean water to drink, healthy food to eat, health, shelter, security, and virtuous life first. Everything else is secondary. All this is easily accomplished by the above mentioned solution. The aims of World Health Organization (About WHO) and the World Bank (Climate Change) will also be met.

Any system on earth can not be successful without the **man of character**. Hence Man-making (via *Vedic* Education) is essential.

Maharshi Dayanand Saraswati Chair (UGC)
Maharshi Dayanand University, Rohtak, Haryana

Resource Person

Prof. Niranjan Lal Mangla
Vedic Scholar and Ex-Associate Professor, YMCA University of Science &
Technology

Presidential Address

Prof. Roop Kishore Shastri
Vice Chancellor, Gurukula Kangri University

Convenor

Prof. Ravi Prakash Arya
Maharshi Dayanand Saraswati Chair
Maharshi Dayanand University, Rohtak

Maharshi Dayanand Saraswati Chair (UGC)
Maharshi Dayanand University, Rohtak, Haryana
