SYNERGISTIC TRAINING PROGRAM UTILIZING
THE SCIENTIFIC AND TECHNOLOGICAL INFRASTRUCTURE

DST – STUTI SCHEME

The Scheme 'Synergistic Training program Utilizing the Scientific and Technological Infrastructure' (STUTI) is intended to build human resource and knowledge capacity through open access to S&T Infrastructure across the country. As a complement to the various schemes of DST funding for expansion of R&D Infrastructure at academic institutions, the STUTI scheme envisions a hands-on training program and sensitization of the state-of-the-art equipment as well as towards sharing, while ensuring transparent access to S&T facilities.

HIGHLIGHTS *OF THE PROGRAMME*

This 7-day Workshop aims to equip the participants with the basic knowledge of different state-of-the-art Materials characterization techniques. The participants will experience hands-on training on x-ray diffractometer, DSC/TGA, BET surface area analyzer, Impedance analyzer, Potentiostat /galvaostat, UV-visible, Photoluminescence, and FTIR spectrometers. The training will revolve around different thermal, structural, optical and electrical characterization techniques followed by data analysis. Now a day, the world is facing energy crises; in this direction, one aspect is the generation of energy without polluting the environment and other is the storage of energy. The surface area, thermal stability, structural, optical and electrical properties of a particular material play an important role in its selection as luminescent materials for solid-state lighting applications, electrolyte/electrode materials for battery and supercapacitors applications. After going through this training program, the participating budding scientists of the future will find themselves confident in characterization and data analysis of materials for energy storage such as 2D materials, hydro-gels, metal oxides, metal sulphides, glass, glass ceramics, ferroelectric ceramics etc.

OBJECTIVE OF TRAINING

To build human resources and its knowledge capacity through open access to S & T Infrastructure across the country through hands-on training programs by:

- Organising short term courses.
- Enhancing awareness of the use and application of state-of-the-art equipment.
- Sharing while ensuring transparent access of S&T facilities funded by DST

WHO SHOULD ATTEND?

The training is organized to enhance the practical skills of Post Graduate Students, Research Scholars, Faculty Members from Universities/Colleges, Scientists, and Post-Doctoral Researchers who are working in multidisciplinary/ transdisciplinary and translational research in various organizations.

Eligibility:

- a. Person of Indian Origin
- b. Min. Qualification should be Post Graduate (Science) or B.Tech.(Technology)
- c. Professor /Scientist / Post-Doctoral Fellows / PhD Fellow / Industry person who are actively involved in R&D

WHY SHOULD YOU ATTEND?

Discover state of the art R&D infrastructure and facilities funded by DST and held by various R&D institutions / Universities in the country.

- Gain hands-on experience of research through latest S&T equipment and facilities.
- Design experiments by selecting appropriate/ alternate equipment for the various experiments.
