

About the Department

Department of Forensic Science was established as a separate department under the faculty of Interdisciplinary Studies in March 2021. Earlier M.Sc. Forensic Science course was started in the Department of Genetics under the Faculty of Life Sciences in 2010. UGC also funded M.Sc. course under its Innovative Program during 2012-17. Department does have well established research laboratories, and successfully progressing in Forensic Chemical Sciences, Forensic Biological Sciences as well as Forensic Physical Sciences. Faculty members have been publishing their research findings in several journals of National and International repute. Seven students have been awarded PhD in forensic science and eleven are continuing. So far, more than 60 students have qualified UGC-NET exam, and several also have qualified FACT/FACT PLUS examination.

About the Workshop

Forensic science, the sibling of science has transformed the criminal adjudication especially the criminal trial process. When reporting scientific evidence in a forensic context, maintaining the chain of custody (CoC) is essential. Chain of custody administers the collection, handling, storage, testing, and disposition of crime evidences. It helps to ensure protection of evidence against tampering or substitution. Chain of custody documentation should list all the people involved in the collection and preservation of evidence and their actions, with a stamp for each activity. Objective of this workshop is to make students highly conversant with Chain of custody (CoC) in forensic investigation by orienting their minds on medico-legal and forensic investigation proceedings in criminal justice system through prototypical chain of custody.
