## About workshop

Research is the process for producing relevant knowledge for the society. However, maintaining the quality of research has always been a big challenge. Researchers and academicians across the borders are facing the challenge of maintaining the quality of research both in terms of methodology as well as publishing or commercializing their research outcomes. India is a fast developing nation and trying to reinforce the quality of research by prioritizing it in its latest education policy. The National Education Policy (NEP) 2020 intends to revamp the whole education system including research. However, quality research is possible only when the researchers undergo systematic training in research methodology. Therefore, it is imperative for researchers to understand research methodology and applications of contemporary tools and techniques for conducting research.

In pursuit of reorientation and up-skilling the research abilities of young minds of research scholars of Life Sciences and Pharmaceutical Sciences, Faculty of Life Sciences in collaboration with Faculty of Pharmaceutical Sciences and Chaudhry Ranbir Singh Institute of Social and Economic Change (CRSIS &EC), Maharshi Dayanand University, Rohtak, is organizing a One Week Workshop in Research Methodology, from 13<sup>th</sup> March, 2023 to 17<sup>th</sup> March, 2023.

## Objectives of workshop

- To enable the participants understand the relevance of research for society and select issues/topics of research which are relevant to the society
- To skill the participants to understand and define the research problems and design them suitably.
- To enhance the knowledge of recent advances in Life Sciences & Biological Sciences
- To sensitize the participants about ethical and IPR issues in research
- To sensitize the participants about quality research and quality publications.
