ABOUT THE WORKSHOP

Statistical methods are essential for scientific research. In fact, statistical methods dominate the scientific research as they include planning, designing, collecting data, analyzing, drawing meaningful interpretation and reporting of research findings. Furthermore, the results acquired from research project are meaningless raw data unless analyzed with statistical tools. Therefore, determining statistics in research is of utmost necessity to justify research findings.

Acknowledging the growing significance of Statistical Tools and Methods in Research, the workshop aim to train the participants on following core areas:

- Bibliometric Analysis
- Research paper writing for High Impact Journals
- The Art & Science of Writing & Publishing a Research Paper
- Questionnaire & Scales
- Theoretical Modeling and lower-higher order constructs
- Discussion of Seminal Papers for higher order scaling and measurement
- Face and Content Validation
- Discussion of Seminal Papers for calculation, assessment and reporting of Item Analysis
- Ethical Research: Formulating & Solve Problems
